A-SMART ADVANTAGE

CONSIDER THESE VALUE ADDED SERVICES

Before You Make A Longterm Investment

Armstrong Medical Offers:

- Nationwide coverage (over 40 Sales Representatives)
- Pre-sale support
- Delivery support
- Post-sale support
- *The Best Overall Value Around*

FEATURES OF A-SMART® PREMIER™ ALUMINUM CART

- **ALUMINUM Carts are 35% lighter than Steel**
- **Full Extension Ball Bearing Drawer Slides**
  Ensures that your drawers will open and close smoothly every time.
- **Quality Aluminum Construction**
  One-piece outer shell construction providing you with added strength and stability. Locking components consist of zinc plated and galvanized parts.
- **Double Side-Wall Construction**
  Armstrong's A-SMART® Carts offer you the added protection of our double side-wall construction. The outer wall adds an extra layer of protection to ensure that your drawers, attached to the inner wall, will always slide smoothly.
- **Two Interchangeable Locking Systems**
- **Customize Your Locking Configuration**
  Lock individual drawers, double lock drawers, use multiple types of locks on the same cart.
- **Slide-Thru Side Shelf**
- **Contour-Fit Plastic Top**
- **Four Vertical Aluminum Corner Mounting Tracks**
  For easy accessory attachment (eliminates the need for holes).
- **Stabilizing Frame With Bumper**
  Casters are moved out from underneath to the outside of the cart. This extra wide base provides your cart with added stability.
- **18 Colors Available**
  Allows you flexibility in your carts appearance. Choose colors to specify department or function, or even use multiple colors on the same cart to differentiate drawers.
- **Highest Quality Swivel Casters (two locking, one tracking)**
  Quiet, durable, German-made casters. Smoother, easier maneuvering.

FEATURES OF A-SMART® CARTS

NOT ALL FEATURES AVAILABLE ON ALL CARTS

See pages 5-9 for more details

Stabilizing Frame with Bumper prevents injuries. Casters are moved from under the cart to outside its perimeter. This extra-wide base provides your cart with added stability (casters and bumpers are moved further away from the base on the drawer side to balance the weight of opened drawers).

Accountability & Wireless Management

Network Software

WEL-SW Network Software

- Operates on 802.11g/802.11n frequencies (at designated check-in intervals)
- Comes with (1) client access license and (1) server license

*Please call customer service for a complete list of requirements

WEL-SWC Additional Single Client Access License

WEL-IT IT Technical Support Agreement, Annual

WEL-HR WEL Prox Reader, Hand-Held

WEL-HRI-SE WEL iCLASS® Reader, Hand-Held

Windows Based

The Network Software allows the administrator to communicate with the Wireless Carts through the facility's 802.11g/802.11n network. As users and settings change, all of the changes can be made by the administrator from the comfort of their desk. As each Wireless Cart checks into the network at the designated check-in intervals, all information will be automatically updated at each and every cart.

Many configurable options including:

- Add, edit, view, and delete users
- Control of cart settings (ex: auto-lock defaults, alarm set-up, keypress volume level, etc.)
- View audit trails which include activity as to when the cart (and CS drawer when applicable) is open, locked, key override activity and alarms
- Email & SMS (Short Message Service) Alert allows for text message, fax, and voice notification system for alarms and low battery notification with provider
- Time interval for PC/WEL cart updating frequency
- eReport notification allows system to automatically send activity reports on a daily, weekly, or monthly basis

It is recommended that your Armstrong Wireless Carts are configured using PSK (pre-shared key).

Customer is responsible for installation. Before purchasing software, it is imperative to contact your IT department concerning installation.

. . . With Optional Proximity Reader.

Optional Factory Installed Proximity Reader

PEL-PR Proximity Reader

PEL-PC HID® Prox Card

PEL-PS Proximity Card Sticker
(makes non-compatible prox cards compatible)

Simply wave the card in front of the reader to open. Lock the cart by pressing the lock button or set the Auto-Lock Timer for anywhere from 1 to 998 minutes. The Proximity Reader will read most low frequency HID® Prox Cards (125 kHz).

The Proximity Reader is a factory installed option on the Auto-Locking Carts only. This upgrade must be noted at the time of purchase. The Proximity Reader can not be retrofitted on existing carts. Electronic capabilities include all the features of the Auto-Locking Carts.

NOTE: If you wish to use your current HID® cards, or purchase new cards or stickers, each card must be made available to be programmed individually into each cart.

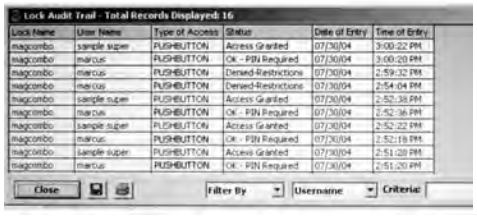
For optimal performance, be sure to check batteries every 6 months.

***Please note for the Armstrong PEL and WEL carts, we suggest using alcohol only for the electronic keypad surface. Please completely dry keypad and surrounding area after alcohol application.**

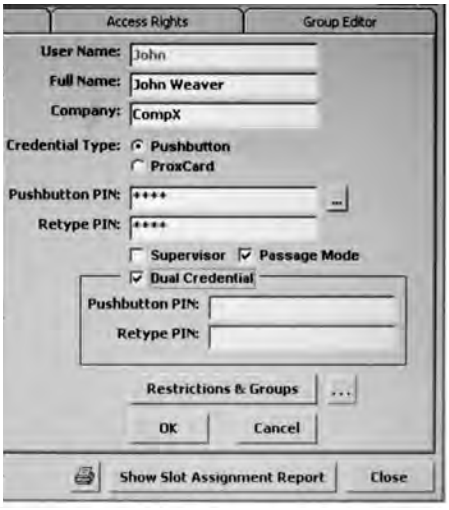
*PEL-CB-24 shown above with **optional** PEL-PR Prox Reader*

Auto-Locking Cart Software

Access Rights



Access Log



User Editor

PEL-SW Auto-Locking Cart Software*

Software is Windows™ based and requires a USB connection. It allows you to add, edit, view, and delete users, supervisors, and specific carts (see screenshot examples to the left). The access log can display the time of entry by each assigned user. You may also create user groups, and restrict users by specified times of the day or days of the week.

Customer is responsible for installation. Before purchasing software, it is imperative to contact your IT department concerning installation.

Aluminum 24" Auto-Locking Mini Cart

(with Optional Factory Installed Proximity Reader)

NMC-4Color 5-Drawer 24" Auto-Locking Mini Cart
PEL-PR Optional Proximity Reader

Overall: $34^{15}/_{16}$"H x $20^{11}/_{16}$"D x $21^{3}/_{8}$"W.
Drawer heights: 3"H (3), 6"H, 9"H.
Weight: 75 lbs.

Features:

- **Keyless Entry**
- 11 colors available
- Lightweight aluminum construction
- Master code for all programming
- Access code for normal, daily use
- Up to 250 user codes possible
- Manual or automatic locking
- Auto-Lock Timer can be set from 1 to 998 minutes, or it can be shut off so that the cart never auto-locks
- Battery operated; never needs to be plugged into an outlet
- "Low Battery" indicator light
- Manual key override for emergency access
- **NEW** Aluminum mounting tracks for easy accessory attachment

Simply wave the card in front of the reader to open. Lock the cart by pressing the lock button or set the Auto-Lock Timer for anywhere from 1 to 998 minutes. The Proximity Reader will read most low frequency HID® Prox Cards (125 kHz).

NMC-4B with ***optional*** PEL-PR Prox Reader

Please note for the Armstrong PEL and WEL carts, we suggest using alcohol only for cleaning the electronic keypad surface. Please completely dry keypad and surrounding area after alcohol application.

Broselow® Pediatric Resuscitation System

AE-4700

Broselow® Pediatric Resuscitation System

AE-4700 Broselow® Pediatric Resuscitation System, $2,770.00

Includes twenty-eight size-specific procedural modules in seven pouches, flying carpet, Broselow® Pediatric Emergency Tape, and all other equipment shown at left. All contained in a heavy-duty ALS equipment organizer.

The Broselow® Pediatric Resuscitation System is approved for the PALS education program. For children 3 to 36 kg.

NEW Broselow® Pediatric Emergency Tape *(2025 Edition)*

AE-4800 Broselow® Pediatric Emergency Tape, 5/pkg., $130.00

The 2025 version of the Broselow Reference Tape will be compliant with the most current PALS Standards

- Pre-calculated doses in milligrams, as well as all doses in pre-calculated ml, making the entire process error free by removing the need for any calculations.
- The new tape will accommodate for obesity by allowing for a habitus adjustment if deemed appropriate to the tape weight estimation.

1. Measure
Measure the child with the Broselow® Tape. This gives you an accurate weight estimate, equipment sizes, and drug dosages.

2. Treat
Reach into the bag for exactly the right equipment for I.V., intubation, O_2 delivery, or intraosseous access. There's no guessing.

AE-4800

See page 64 for more details.

Broselow® Emergency Equipment Organizers

AE-4825 Mini Broselow® Equipment Organizer, $385.00

Premier™ Emergency Packages, pages 27, 29 *Cart Accessories, pages 44-55*

Restock Only The Accessed Drawers. Save Money. Save Time.

Don't waste money checking crash cart drawers that haven't even been opened. With A-SMART® Premier™ Carts, individual drawer seals can be arranged so that only the accessed drawers need to be checked for inventory, a small investment that pays off with every use.

- *Double lock medication drawers*
- *Improve equipment security*
- *Ready for changing needs*

When carts are shared by departments or personnel, A-SMART Premier's locking options allow each to be locked with a separate key. Never wonder about who else has access to your equipment.

Maybe you don't need this kind of flexibility now, but you might later. With A-SMART Premier, you can update your locking system at any time. Need to change a mobile workstation into a crash cart? No problem. Need to add a key lock to an existing cart? Done. Only A-SMART Premier offers you that kind of flexibility.

Locks may be placed on either corner glide for flexible security. ***Double locking*** drawers can help control inventory and access.

Breakaway Locking Bars

Mix lock sizes and types for precise inventory control.

Size	Prod#	Price
3″	PBR-3	$58.00
6"	PBR-6	$61.00

In-Wall Auto-Locking Storage Cabinet

On-Wall Auto-Locking Storage Cabinet

Auto-Locking In-Room Storage Cabinets

call for more information

These Auto-Locking Storage Cabinets are perfect for extra security of items inside patients' rooms or nurses stations. With this cabinet, you get all the great locking features of our Auto-Locking Carts. Choose from in-wall or on-wall cabinets. Cabinets are made of 18 guage cold rolled steel with 16 guage aluminum doors. Both models come with two separate storage areas, each with its own individual auto-lock and key override. Customized dimensions and colors are available. Cabinets shown are approximately 28.44"H x 3.83"D x 22.60"W. Call customer service for more details.

- Minimum order of 25
- Master code for all programming
- Access code for normal, daily use
- Up to 250 user codes possible
- Manual or automatic locking
- Auto-Lock Timer can be set from 1 to 998 minutes, or it can be shut off so that the cabinet never auto-locks
- Auto-Lock Timer programming can be limited to master code only
- Battery operated; never needs to be plugged into an outlet
- "Low Battery" indicator light
- Manual key override for emergency access

***Please note: We suggest using alcohol only for cleaning the electronic keypad surface. Please completely dry keypad and surrounding area after alcohol application.**

Electronic Push-Button ClearView™ Security Drugbox

see page 46

Security Box and Trellis Systems

ClearView Security™ Drug Box and Shelf

ACV-1EL Electronic Push-Button ClearView Security Drug Box with Key Override *(manual locking)*, $550.00
CVS-1 ClearView Shelf, $130.00

The ClearView provides a great way to secure your medications, small equipment, patients' personal valuables, RSI equipment, and so much more. The ClearView also allows for a clear view of your inventory and also allows for anesthesia cases to be set up in advance while still keeping instruments/drugs secure. The ClearView can be mounted to a wall, in a patient's room, or even on an A-SMART® Cart.

Features:

- Supervisor code for all programming
- User code for daily use (19 user codes available)
- Manual key override for emergency access
- Codes must be 4-8 digits in length
- Natural HDPE cabinet with clear PVC door
- Corrosion-resistant
- Uses Alkaline batteries

Dimensions: $7\frac{1}{2}$"W x 14"D x $7\frac{3}{8}$"H
Weight: 5 lbs

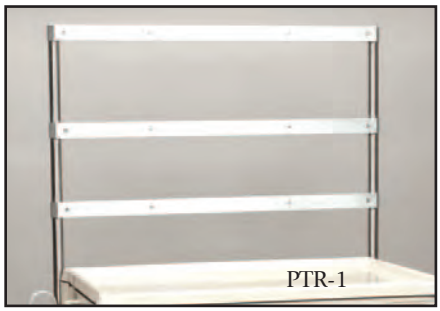
NOTE: No auto-locking features (control knob must be turned manually to lock and unlock).

To clean, apply non-acid based cleaner to a clean cotton cloth, do not spray directly on lock. Wipe down keypad and its respective housing surfaces of excess cleaner.

For optimal performance, it is recommended the batteries be replaced on an annual basis.

Attach the ClearView Security Drug Box to an A-SMART® Cart with the CVS-1 ClearView Side Shelf.

Trellis Systems



PTR-1 PREMIER™ Trellis System, $220.00
Adds up to 21" to cart height. Bars are height-adjustable. Includes two uprights and three cross bars.

PTR-5 PREMIER™ Trellis System with Hooks, $292.00 *(not pictured)*
Adds up to 21" to cart height. Bars are height-adjustable. Includes two uprights and three cross bars. Includes one bar with five hooks in the top rail.

Tilt Bin Organizers Maximize Storage

Tilt Bins Organizers

Designed for modular assembly, Tilt Bins organize supplies to match your needs. Clear Tilt Bins leave stock visible for quick identification, yet are securely arranged.

Each bin has a slot for labeling and swings open for easy access. Bins are removable for cleaning or refilling.

NOTE: A Trellis Rail System or Shelving Unit (except ACD-1N, PCD-1, PLS-1, and ALS-1) is required to mount Tilt Bins to an A-SMART Cart. See page 46 for Trellis Rail Systems and page 50 for Shelving Units.

ATB-6X Six-Bin Unit, $33.00
Each bin measures: 4 1/2"H x 5 1/4"D

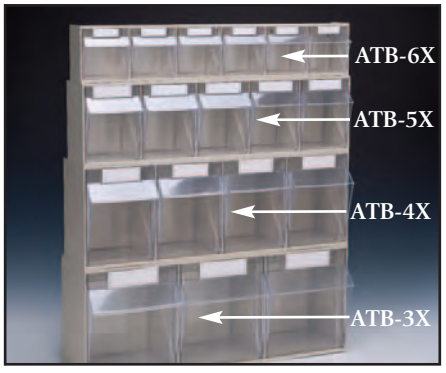
ATB-5X Five-Bin Unit, $43.00
Each bin measures: 6 1/2"H x 5 1/4"D

ATB-4X Four-Bin Unit, $63.00
Each bin measures: 8 1/8"H x 6 5/8"D

ATB-3X Three-Bin Unit, $78.00
Each bin measures: 9 1/2"H x 7 3/4"D

Each Tilt Bin Organizer has a total width of 22 1/2".

All products are compatible with both Standard and Premier™ Carts unless otherwise stated.



A combination of bin sizes can be used to accommodate multiple-sized supplies or equipment.

Need More Organization For All Your Supplies? See pages 52-54.

Lockable Tilt Bin Organizers

NOTE: A Trellis Rail System or Shelving Unit (except ACD-1N, PCD-1, PLS-2, and ALS-2) is required to mount Tilt Bins to an A-SMART Cart. See page 46 for Trellis Rail Systems and page 50 for Shelving Units. ***Accessories (including Lockable Tilt Bins) can't be mounted directly above Lockable Tilt Bins.***

ClearView Security™ Drug Box

ACV-1EL Electronic Push-Button ClearView Security Drug Box with Key Override *(manual locking)*, $550.00
CVS-1 ClearView Shelf, $130.00

The ClearView provides a great way to secure your medications, small equipment, patients' personal valuables, RSI equipment, and so much more. The ClearView also allows for a clear view of your inventory and also allows for anesthesia cases to be set up in advance while still keeping instruments/drugs secure. The ClearView can be mounted to a wall, in a patient's room, or even on an A-SMART® Cart.

For maintenance instructions, see page 46.

Features:
- Supervisor code for all programming
- User code for daily use (19 user codes available)
- Manual key override for emergency access
- Codes must be 4-8 digits in length
- Natural HDPE cabinet with clear PVC door
- Corrosion-resistant
- Uses Alkaline batteries

Dimensions: 7 1/2"W x 14"D x 7 3/8"H
Weight: 5 lbs

ACV-1EL

NOTE: No auto-locking features (control knob must be turned manually to lock and unlock).

DUET™ AC Suction with Battery Backup

CALL FOR PRICING

AE-6975 DUET™ AC/Battery-Powered Suction Unit with Built-in Automatic Battery Care and Protection

AE-6976 DUET™ AC/Battery-Powered Suction Unit with Retention Bracket (mountable on carts or walls)

AE-6975

The Duet is perfect for hospital crash carts, patient transport, surgi-center backup, long term care facilities and more.

- An AC suction unit with battery backup, the Duet provides instant, powerful suction whether or not AC power is available.
- Built-in charger maintains battery and will not overcharge. Keep it plugged in at all times for maximum battery health.
- 3 year battery replacement policy for properly cared for devices!
- When fully charged, the sealed lead acid battery provides 45 minutes +/-10% of suctioning power, giving you the suction you need for emergency care procedures.
- Battery condition indicator.
- 1200cc Bemis canister included.
- Pump Airflow: Approximately 50 lpm.
- Clinical Airflow: 30+ lpm (achieved at tip of patient tubing).
- Size: 17"L x 9"H x 6"W; weighs 10.5 lbs.
- Battery Type: Sealed lead acid.

Flat back unit sits conveniently on a cart or shelf. Bracket back unit will attach to the side of the cart or to a wall saving valuable shelf and cart top space.

ETL listed, conforms to UL STD 2601-1, 2nd Ed. Conforms to IEC 60601-1 and EN 60601-1-2, and Certified to CAN/CSA STD C22.2 NO. 601.1-M90

- 12V DC Power-cord for connection to vehicle connection
- Weight 4kg (8lbs 13 oz) including battery
- 5 year limited warranty (excluding the canisters, tubing systems and battery)

Broselow® Pediatric Resuscitation System

NEW Broselow® Pediatric Emergency Tape *(2025 Edition)*

AE-4800 Broselow® Pediatric Emergency Tape, 5/pkg., $130.00

The Originally Developed Pediatric Emergency Tape.

When time and accuracy are crucial *during a pediatric emergency situation, turn to the Broselow® System which is designed with children's care and procedural accuracy in mind. Each color-coded system supplies you with all the medical dosage information and size-specific equipment you need for your young patients' emergency resuscitation requirements.*

QUICK AND SIMPLE

1. Measure

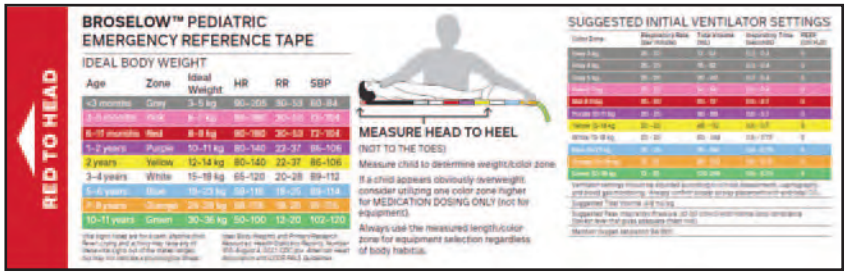
Measure the child with the Broselow® Tape. This gives you an accurate weight estimate, equipment sizes, and drug dosages.

2. Treat

Reach into the bag for exactly the right equipment for I.V., intubation, O_2 delivery, or intraosseous access. There's no guessing.

The 2025 version of the Broselow Reference Tape will be compliant with the most current PALS Standards and will include the following:

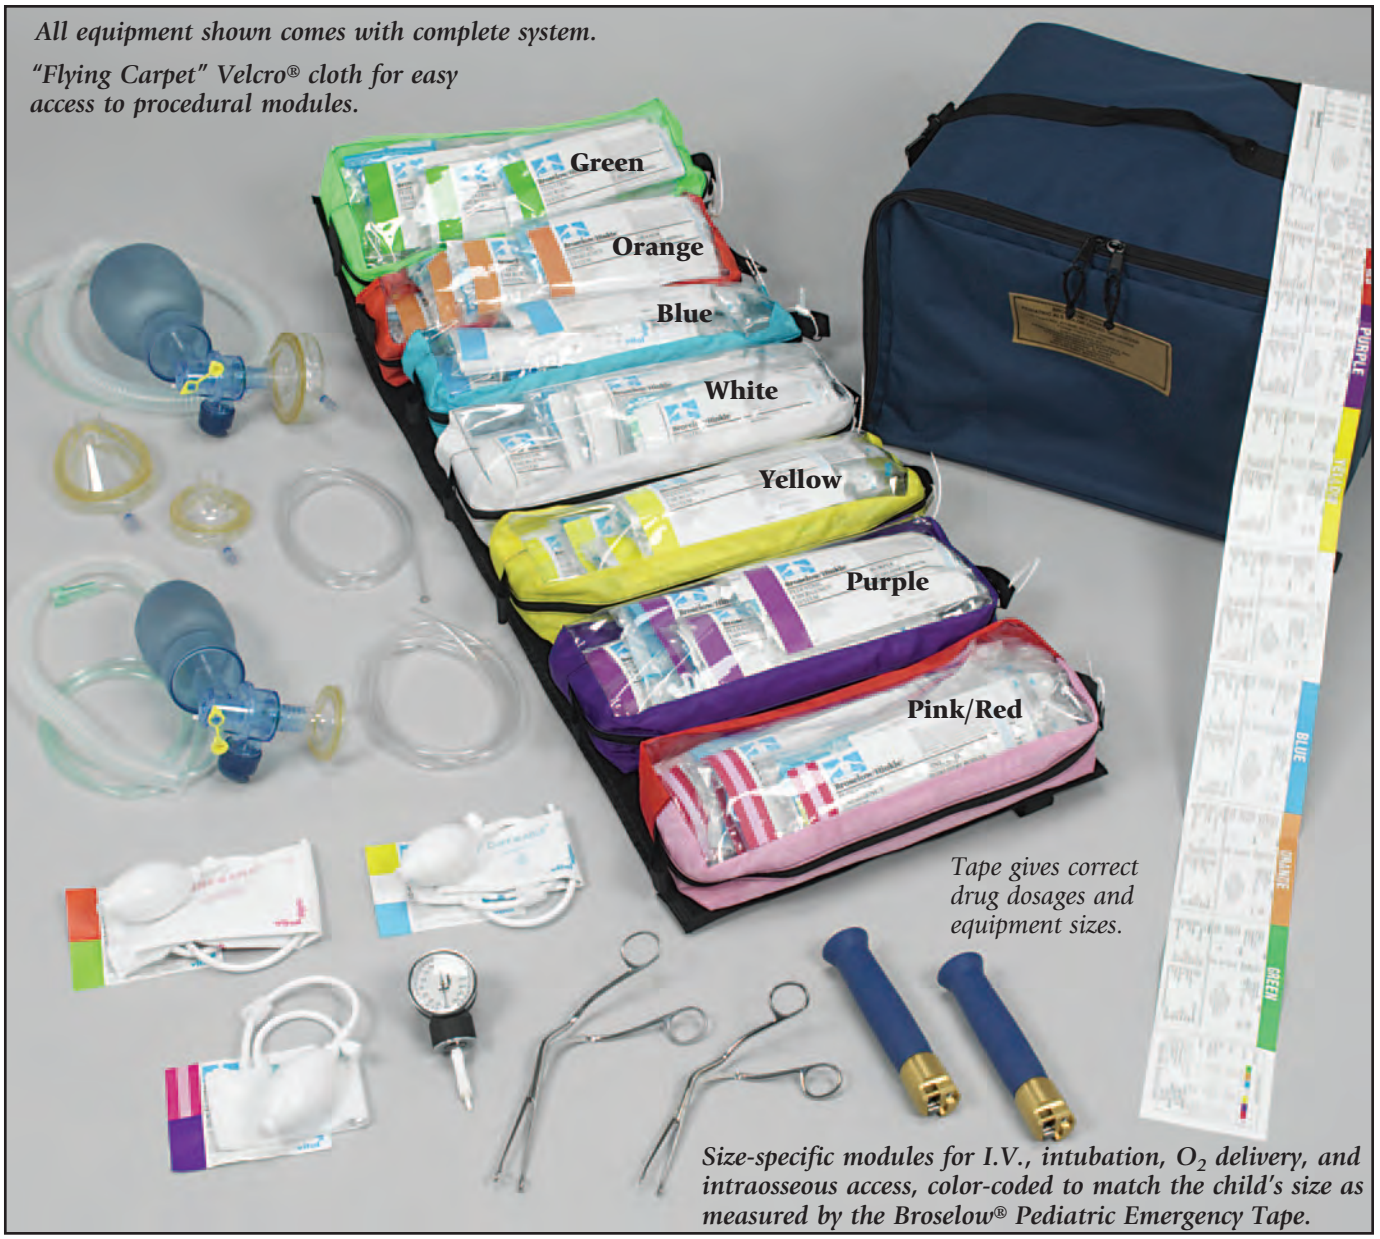
- Pre-calculated doses in g, mg, and mcg, as well as all doses in pre-calculated ml, making the entire process error free by removing the need for any calculations.
- The new tape will accommodate for obesity by allowing for a habitus adjustment if deemed appropriate to the tape weight estimation.
- When used without the habitus adjustment new tape provides an accurate estimate of Ideal Body Weight, over actual body weight, which is preferred for many emergency medications.
- Updated with additional essential medications for both EMS and the ER.
- Contains a separate section, Quick Access Meds, for those medications needed immediately, but IV/IO access has not yet been obtained.



NEW UPDATES

Experience streamlined functionality with our newly updated tape featuring vibrant color zones, reorganized tables, and added quick-reference vitals for faster decision making. No longer commonly utilized medications and routes have been removed along with essential equipment updates. Fully aligned with current PALS standards, this version ensures enhanced usability and compliance with the latest clinical guidelines.

- **Enhanced Reference Tools:** Ideal Body Weight table now consolidates all information with clear titling and sourcing. Updated and color-coded ventilator settings and recommended concentration tables reorganized for better usability.
- **Updated Guidelines:** Conforms to the current PALS guidelines, aligning with the latest clinical recommendations.
- **Optimized Emergency Data:** Added weights on both sides of the tape, quick-reference vitals on color zones and current ISMP medication safety recommendations
- **Refined Design:** Front panel rearrangements, QR Code, "Red to Head" nomenclature, and vibrant color zones.
- **Drug and Equipment Adjustments:** Obsolete drugs removed, newer essentials added, and critical airway device specifications highlighted for universal clarity.
- **Updated Medications and Equipment:** Updated commonly used medications and emergency equipment. Removed no longer commonly used emergency medications and routes to enhance safety and reduce the chance for error.



Broselow® Pediatric Resuscitation System

AE-4700 Broselow® Pediatric Resuscitation System, $2,770.00

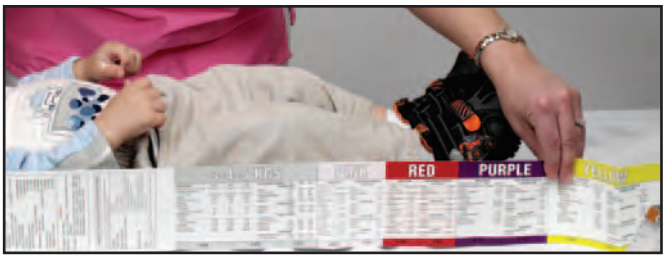
STEP 1 ***Measure the length of your pediatric patient with the Broselow® Pediatric Emergency Tape.*** Child's length (shown as purple at right) falls within a color bar and weight zone on the Broselow® Tape (see page 65).

A reference at each color bar on the tape informs you of equipment sizes to perform emergency resuscitation on the child. A reference at each weight/color zone on the tape shows pre-calculated medication dosages in milligrams. Designated resuscitation equipment is contained in corresponding, color-coded equipment pouches or drawers.



STEP 2 ***Find specific equipment swiftly and accurately with the Broselow System as your guide.*** Color-coded pouches contain size-specific equipment needed for pediatric emergency resuscitation.

Use A-SMART® to create a complete pediatric resuscitation system. Premier™ Broselow® ColorCode Carts provide color-corresponding space and locking options to stock medications and additional equipment. Example on the right shows:

PBL-PC-9A Premier™ Broselow® Complete ColorCode Cart System

Includes **PBL-PC-9** (basic cart, see page 41), **AE-4712** (procedural modules), **AE-4703** (equipment pack), and a single Broselow™ Pediatric Emergency Tape.

Cart shown at right with ***optional*** *ASU-1 Suction Unit Holder, AOB-1 Oxygen Tank Bracket, PIV-1 IV Pole, PBR-3 (8) 3" Breakaway Locking Bar, PBR-6 (1) 6" Breakaway Locking Bar, and AE-6975 S-SCORT® DUET Suction Unit (see page 63).*

NEW Broselow® Pediatric Emergency Tape *(2025 Edition)*

AE-4800 Broselow® Pediatric Emergency Tape, 5/pkg., $130.00

The Originally Developed Pediatric Emergency Tape.

When time and accuracy are crucial *during a pediatric emergency situation, turn to the Broselow® System which is designed with children's care and procedural accuracy in mind. Each color-coded system supplies you with all the medical dosage information (except for infusion drugs) and size-specific equipment you need for your young patients' emergency resuscitation requirements.*

QUICK AND SIMPLE

1. Measure

Measure the child with the Broselow® Tape. This gives you an accurate weight estimate, equipment sizes, and drug dosages.

2. Treat

Reach into the bag for exactly the right equipment for I.V., intubation, O_2 delivery, or intraosseous access. There's no guessing.

The 2025 version of the Broselow Reference Tape will be compliant with the most current PALS Standards.

See page 64 for more details.

Restock Your Broselow® Cart or System

Broselow® Procedural Modules

AE-4712 Broselow Procedural Modules, $1,315.00

A complete set of twenty-eight refill procedural modules for the Broselow® System. *Laryngoscope handles sold separately.*

Each color zone includes one of each module: Intubation, O_2 Delivery, IV Delivery, and Intraosseous.

AE-4712

Broselow® Pediatric Emergency Tape

see page 64.

AE-4703

Broselow® Equipment Pack

AE-4703 Broselow Equipment Pack, $1,315.00

Includes two color-coded disposable manual resuscitators, four cuff masks, three color-coded disposable BP cuffs, one gauge, two Magill forceps, and two Vital View II™ LED fiber optic laryngoscope handles. *Call for details.*

Replacement Supplies:

AE-4705 Disposable Infant BP Cuff (Pink/Red/Purple), 5/case, **$148.00**

AE-4706 Disposable Child BP Cuff (Yellow/White/Blue), 5/case, **$148.00**

AE-4707 Disposable Sm. Adult BP Cuff (Orange/Green), 5/case, **$156.00**

AE-4713 Manometer for Cuff, 5/case, **$156.00**

8503 Magill Forceps, Child, **$15.00**

8504 Magill Forceps, Adult, **$16.00**

4556 Laryngoscope Handle, **$310.00**

AD-200

Armstrong Sphyg

AD-200 Adult, $43.00
AD-200C Child, $43.00
AD-200-O Adult Large, $55.00
Nylon blue cuff with printed index, range markings, and artery label. 300 mmHg, no-pin-stop manometer. Ten-year calibration warranty.

808 Blood Pressure Gauge, **$19.00**

AD-215

Premium Sphyg

AD-215 Premium Armstrong Sphyg, $60.00
AD-215I Infant, $60.00
AD-215C Child, $60.00
AD-215-O Large, $67.00
AD-215-B Bariatric (44.66 cm), Burgundy, $81.00

- Lifetime calibration warranty
- Heavily chrome plated
- Navy cuff includes gauge holder
- Luminescent dial
- Includes zippered case

AD-135T

Stethoscope and Aneroid Sphyg Set

AD-135 Stethoscope and Sphyg Combo Set, Black, $53.00
AD-135T Teal, $53.00
AD-135R Red, $53.00
Color-coordinated combo sets include an aneroid sphyg with 300 mmHg no-pin-stop manometer, bladder, and bulb; and a Sprague-type stethoscope in a nylon carrying case. Twenty-year calibration warranty. Five-year warranty on Sprague.

AD-140

AD-220

Quad Cuff

AD-140 Quad Cuff Multiple BP Kit, $170.00
Includes child, small adult, adult, and large adult pre-gauged cuffs with artery label and inflation system. 300 mmHg, no-pin-stop manometer with bulb. Includes nylon case. Ten-year calibration warranty.

AD-130 Tri-Cuff Kit, $159.00
Same features as the Quad Cuff, but without child size.

AD-220 Armstrong Economy Hand-held Adult Aneroid Sphyg, $93.00

LinkTemp® Non-Contact Infrared Thermometer

AD-325 LinkTemp® Non-Contact Infrared Thermometer, $135.00

AD-325

The LinkTemp is designed to produce an instant forehead temperature without contact by reading the radiated temperature of the forehead vasculature. The vasculature in this area is linked to the heart by the carotid artery, which is directly linked to the aorta. It forms part of the main trunk of the arterial system. So long as the patient's blood flow is permanent and regular, the method allows precise measurements of the temperature.

- No probe covers required; significant annual savings
- No contact with patient's skin reduces the risk of cross-contamination
- Non-contact reading in 1 second from 1.2-2" away
- Two color LCD with highly accurate 1/100 degree reading
- Temperature can be displayed in F or C
- Automatic power off (30 seconds) to conserve energy
- Modes for body, surface and room (ambient) temperature
- Visual/audible alarm if temperature exceeds 100.4°F
- Performs up to 100,000 readings
- Long battery life

Includes an anti-theft locking feature. 2 year warranty on instrument heads and handle, lifetime warranty on LED lamp.

HEINE Laryngoscopes

STERRAD® Compatible

Blade not included

HEINE EasyClean LED Laryngoscope Handle *CALL FOR PRICING*

8721ECL Heine Adult EasyClean LED Laryngoscope Handle
8720ECL Heine Pediatric/Slim EasyClean LED Laryngoscope Handle
8722ECL Heine Stubby EasyClean LED Laryngoscope Handle

The ultimate "Green" option to help reduce your carbon footprint. The HEINE EasyClean LED Laryngoscope Handle was developed to allow even simpler, faster and safer hygienic reprocessing of the handle – no complex disassembling and assembling of batteries and light unit. This saves the technical service personnel a great deal of time, and reduces the training and maintenance effort.

- Non-slip "Wave Design" provides a more secure grip and allows for wipe disinfected after use
- 100% waterproof: in the case of immersion disinfection ('High-Level Disinfection') or low temperature sterilization processes (STERRAD®, STERIS®), neither the batteries nor the LED light unit need to be removed
- No removal of the light unit required for use in autoclaves, just batteries
- Maximum brightness: 3 x brighter than conventional halogen light, 4,000 lux (20 lm) at a distance of 20 mm from the blade tip
- Authentic color rendering and homogeneous illumination
- Typically 10 hours of operating time (in continuous operation); battery handle for 2 x C-cells (R14/LR14)
- Fade-out feature: brightness reduces slowly as battery operating time diminishes, for even more efficient battery use
- Compatible with all laryngoscope blades according to ISO 7376 (Green Standard)

HEINE Classic Fiber Optic Blades *CALL FOR PRICING*

- Large, bright, 4.3mm fiber optic bundle (Macintosh blades only)
- Choice between halogen or LED light sources
- Low maintenance; easy to clean
- Compatible with a variety of high-level disinfection and sterilizing methods - call for IFUs
- Ten-year performance guarantee on fiber optic bundle; lifetime warranty against manufacturer's defect

HEINE LED Laryngoscope Handle & *HEINE* NT 300 CHARGER *CALL FOR PRICING*

8721LED Adult Rechargeable Handle with LED Light Source, Lithium Ion Battery and Status Indicator Cap *(without charger)*

8721LI Adult Rechargeable Handle with LED Light Source and Lithium Ion Battery *(without charger)*

8721LM Adult Rechargeable Handle with LED Light Source and NiMH Battery *(without charger)*

8721L Adult Handle with LED Light Source
Uses disposable "C" batteries.

8721I Adult LED Handle Insert only

8720LM Pediatric Rechargeable Handle with LED Light Source and NiMH Battery *(without charger)*

8720L Pediatric Handle with LED Light Source
Uses disposable "AA" batteries.

8722LM Stubby Rechargeable Handle with LED Light Source and NiMH Battery *(without charger)*

8722L Stubby Handle with LED Light Source
Uses disposable "AA" batteries.

Introducing the new Heine Laryngoscope Handles with LED Light Source. These LED handles offer illumination that is 3X brighter than a 3.5V Halogen Bulb. LED illumination also allows for significantly longer usage time. Plus, the LED Light Source has a lifespan of 50,000 hours and comes with a 5 year warranty.

Heine Handles with LED Light Source are not approved for Sterrad® Sterilizers at this time.

Additional Status Indicator Cap Option

The Status Indicator Cap allows the user to see a more specific charge status anytime. When you turn your handle on or remove it from the charger, the LED Indicator on the bottom cap lights up for 10 seconds displaying how much battery time remains. The Indicator also remains lit at any time a laryngoscope blade is attached to the handle.

The Status Indicator Cap comes with the 8721LED Handle. One can also be added to any Heine Adult Lithium Ion LED or 3.5V Lithium Ion Halogen Handle (special Lithium Ion battery required). Call Customer Service for details.

8726 NT 300 Charger

The NT 300 Charger offers an easy-to-see visual indicator on your handles charging status. The entire collar of the NT 300 is brightly illuminated. When you place your handle into the well to be charged, the light ring will pulse, indicating your handle is being charged. Once your handle is fully charged, the light rings stay brightly lit for 4 hours indicating the full charge. This unit prevents over charging the battery and helps to guarantee extended battery life. The NT 300 is the only charger that gives you this immediate visual clue as to where your handles stand in the charging process.

The NT 300 fully charges a handle with a dead battery in a maximum of 4 hours and is compatible with all Heine rechargeable laryngoscope handles.

Armstrong Ophthalmoscope & Otoscope Set

AD-425 Ophthalmoscope and Otoscope Set, $260.00
AD-426 Otoscope Only, $139.00
AD-427 Ophthalmoscope Only, $196.00

Ophthalmoscope includes instrument head with halogen bulb, five apertures, and seventeen lenses. Otoscope is fiber optic with removable viewing lens, disposable specula (2.75 mm and 4.25 mm), and insufflator fitting for pneumatic otoscopy. "AA" batteries included in each handle. 2.5V halogen bulb.

Sprague Rappaport

AD-125 Black, $19.00
AD-125RB Royal Blue, $19.00
AD-125R Red, $19.00
AD-125NY Neon Yellow, $19.00
AD-125NOR Neon Orange, $19.00
AD-125NBL Neon Blue, $19.00
AD-125N Navy, $19.00

Each 5-in-1 stethoscope with 22" tubing comes packed in a box with two extra sets of eartips, two diaphragm sizes, and three precision bell sizes. Patented valve design and gasket system virtually eliminate sound leakage.

AD-125

Dual Head Stethoscope

Dual Head Stethoscope
AD-100 Black, $18.00
AD-100LB Light Blue, $18.00
AD-100GLD Gold, $18.00
AD-100GR Green, $18.00
AD-100R Red, $18.00
AD-100RB Royal Blue, $18.00
AD-100NY Neon Yellow, $18.00

Precision-anodized, aluminum chest piece and adjustable, chrome-plated, brass binaurals. 24" tubing.

AD-105

Child Stethoscope

AD-105 Child Stethoscope, $25.00

- Dual head with swivel
- Brass chrome-plated binaural
- One-piece, PVC, 21", black tubing

AD-120

Dual Training Stethoscope

AD-120 Dual Training Stethoscope, $25.00

Permits students to hear exactly what the instructor is hearing. A simple turn of the stem permits a quick change to a Ford-type bell.

AD-611

Adscope® Convertible Stethoscope

AD-610 Adscope Convertible Stethoscope, Black, $79.95
AD-611 Adscope Convertible Stethoscope, Burgundy, $79.95
AD-612 Adscope Convertible Stethoscope, Grey, $79.95
AD-613 Adscope Convertible Stethoscope, Navy, $79.95
AD-614 Adscope Convertible Stethoscope, Royal Blue, $79.95

- Adjustable frequency design (AFD) technology provides the acoustic response of a traditional bell and diaphragm in a convenient two-sided chestpiece
- Extra-large bell for unsurpassed low-frequency response
- Ultra-sensitive diaphragm for amplifications and crisp high-frequency response
- AFD technology further enhances acoustic response: use light pressure for low frequencies, firm pressure for high frequencies

AD-103

Neonatal Stethoscope

AD-103 Neonatal Stethoscope, $25.00

- External binaural
- Dual-head brass chrome-plated chestpiece
- One-piece, PVC, 24", grey tubing

Mini-Wright™ Peak Flow Meters

PF-339X Mini-Wright Peak Flow Meter (60-880 lpm) with NAEP/ATS26 Scale, 10/pkg., $350.00

These compact, portable Peak Flow Meters allow an asthmatic patient's progress to be inexpensively monitored on a daily basis at home, work, or school.

- Help predict asthma episodes
- Allow therapeutic intervention
- Easily cleaned – minimal maintenance

The Mini-Wright measures the maximum flow rate in a forced exhalation – known as the peak expiratory flow (P.E.F.). After determining a patient's best P.E.F. with his/her physician, the patient self-tests daily as instructed by the physician and records the highest reading on a daily trend chart.

The peak flow meter's scale also conforms to the 1991 recommended technical standards by the National Asthma Education Program (NAEP); National Heart, Lung, and Blood Institute (NHLBI); and is based on American Thoracic Society (ATS) Waveform 26.

These meters come with a PF-375 sterilizable mouthpiece with universal tapered design for both adult and pediatric use.

NOTE: Children six years and younger, or those with excessive lung damage, should use the PF-440X low range meter.

PF-440X AFS Low-range Mini-Wright (30-400 lpm) with Sterilizable Mouthpiece, 10/pkg., $350.00

The AFS Low-range Mini-Wright incorporates the Aerodynamic Flow System (AFS) to bring accuracy and consistency to patients with lower peak flow requirements.

This new, smaller Mini-Wright is specifically designed for younger patients. The scale is clear and easy to read.

Mouthpieces for Wright Peak Flow Meter

PF-310 Disposable Mouthpieces and **PF-320** Disposable Mouthpieces for Pediatrics, (*must be used with PF-380*), 500/box: 1 box, **$65.00**; 3 boxes, **$165.00**; 6 boxes, **$300.00**; 12 boxes, **$540.00**

Mouthpieces are not made of cardboard; eliminates dust.

PF-315 Disposable Mouthpieces with One-way Valve, 200/box, **$120.00**

PF-380 Mouthpiece Adapter for Pediatric Use *(allows PF-320 to be used with PF-286)*, **$9.00**

PF-375 Universal Tapered Mouthpiece, **$9.50**

AD-700 Fingertip Digital Pulse Oximeter, $70.00

AD-701 Lanyard, $4.10

AD-702 Bumper, Black, $6.00

AD-704 Bumper, Orange, $6.00

Reads SpO_2 and pulse rate. Has 6 display modes and visible and audible alarms.

AD-705 Admirals™ Pediatric Fingertip Digital Pulse Oximeter, $70.00

- Reads SpO_2 and pulse rate
- Accuracy: SpO_2 +/-3%; HR +/-2 BPM
- Six changeable display modes
- Fits fingers with thickness of 0.2-0.63"

Hospital Equipment

Armstrong Slippery Slider

AE-150 Patient Slippery Slider, 22" x 72", $180.00
AE-155 Patient Slippery Slider, 18" x 72", $180.00
AE-160 Patient Slippery Slider, 18" x 48", $160.00

Alleviate lifting strain, transfer large patients with minimum staff, and ensure patient comfort. Armstrong Medical offers three sizes of Slippery Sliders. Each has an ultra-smooth, polyethylene surface that makes patient transfer virtually free of friction.

- Reduces overexertion related back injuries
- Usable during x-rays; Slippery Slider is radiolucent
- Allows for easy grip with cut-out hand holes
- Strong, lightweight, and thin - all models only 3/16" thick

AE-150

Schrader Connectors

AS-4126

Schrader Medical twist-release gas connectors are safety-keyed for air. This quick connector safely handle up to 200 psi. Design prevents interchangeability of major internal parts for different gases. They are UL certified and comply to NFPA 99 (2002 edition).

Compressed Air Check Unit

AC-611

Physician Digital Scale

AC-611 Physician Digital Scale, $546.00

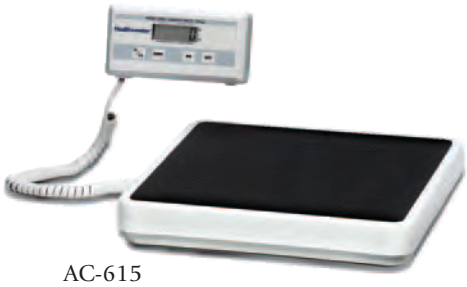
- LB/KG Lock-Out ends prescription errors caused by LB/KG confusion during weighing
- Fully digital platform, from weighing sensors through readout, reduces errors caused by analog parts
- Easy-to-read 1" high LCD display
- Large, low-profile platform provides safer access and stability
- EMR connectivity via USB
- User friendly interface with full compliment of digital functions including BMI
- Capacity: 500 lbs.
- Full two-year warranty

AC-542

Mobile I.V. & Infusion Stands

AC-542 Armstrong LIGHT DUTY Custom I.V. Stand, $210.00

Four-pronged, adjustable (47"-84") I.V. stand has a 20" diameter base and 2" casters. Weight capacity is 22 lbs.



AC-615

Remote Display Scale

AC-615 Remote Display Scale, $381.00

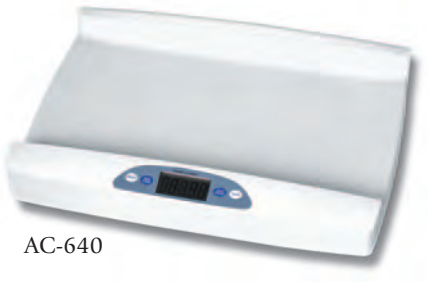
- Remote LCD display on 9' cord
- Weight reading in lbs. or kg.
- 2 oz./0.05 kg. graduation
- 9V battery and AC adapter included
- One-year limited warranty
- Capacity: 400 lbs.
- Full two-year warranty

AC-548

Adjustable Laptop Computer Transport Stand

AC-548 Adjustable Laptop Computer Transport Stand, $530.00

- Stand tray securely holds laptop in place
- Heavy-gauge coated steel construction
- Foot ring easily depresses to adjust stand height 35" to 45" for standing or seated use
- Easy rolling 3" casters provide a smooth, quiet ride
- Side access handles for "grab and go" use



AC-640

Digital Pediatric Scale

AC-640 Digital Pediatric Scale, $479.00

High-performance digital pediatric scale with motion-sensing technology can capture the weights of even the most active babies.

- Easy-to-read LCD
- Large, stable weighing tray with raised edges for baby's comfort and safety
- Weighs in pounds and kilograms
- Waterproof buttons
- Features auto-off, auto-zero, and low-battery indicator
- Tare memory
- Full two-year warranty

AC-549

Security Laptop Stand

AC-549 Security Laptop Stand, 685.00

- Dual-locking work surface keeps laptop and data secure and provides a large work area
- Work area adjusts from 35"-45"
- Hand levers operate a gas spring lift to adjust height for sitting or standing use
- Heavy, five-leg aluminum base for safety and stability

Disposable Splints

AE-1605 Femoral Traction Splint

AE-1600 Arm & Ankle Splint

AE-1604 Adjustable Leg Splint

Speedsplint™

Cost Effective For Hospitals and EMS. Disposable, No Cross-Contamination, Single-Patient Use.

The splint can go with the patient to X-Ray or even surgery and be thrown out after. There is no need to worry about lost expensive splints.

AE-1605 Speedsplint™ Femoral Traction Splint, $100.00

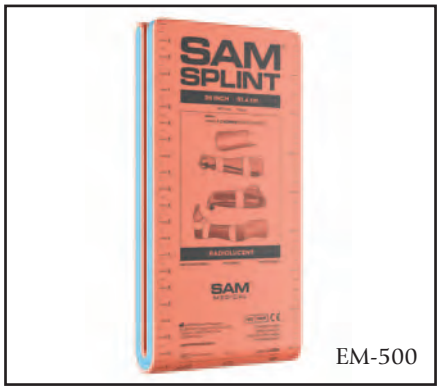
- Includes splint, padding, harness, and groin pads
- Fits anyone up to 6'4" tall
- Has precise traction tension control
- Saves space

AE-1600 Speedsplint™ Multi-Purpose Splint, 10/pkg., $100.00

- Single splint fits bent or straight elbow, ankle, and wrist
- Unique fold-and-splint design reduces medic's pack weight, simplifies inventory requirements, and stores flat for easy transport
- Ideal for arm injuries, as well as foot and ankle injuries

AE-1604 Speedsplint™ Adjustable Leg Splint, $70.00

- Lightweight, temporary immobilization for all leg injuries
- Provides extra support above the knee for difficult-to-splint knee injuries
- Robust ankle support eliminates undesirable leg rotation
- Fits all leg lengths
- Three adjustable sizes: small, medium, and large



EM-500

Sam® Splint

EM-500 Sam® Splint, $17.00
Can splint an arm, leg, or hand. Only 4 1/4" x 36". X-ray invisible, waterproof, and reusable. ***New flat design for better storage.***

EM-501 Sam Splint Jr., 4 1/4" x 18", $12.00

EM-502 Sam Wrist Splint, 4 1/4" x 9", $8.00

EM-505 Sam Finger Splint, 12/pkg., $19.00

Video upon request with purchase.

AE-1600

Speedsplint™ Multi-Purpose Splint

AE-1600 Speedsplint™ Multi-Purpose Splint, 10/pkg., $100.00

- Single splint fits bent or straight elbow, ankle, and wrist
- Unique fold-and-splint design reduces medic's pack weight, simplifies inventory requirements, and stores flat for easy transport
- Ideal for arm injuries, as well as foot and ankle injuries

AE-1800

Prosplints®

AE-1800 Prosplints Complete Adult Splint Kit, $275.00

Includes wrist/forearm splint, full arm splints (small and large), full leg splints (small and large), universal combo splint, universal rib splint, hard e-collars (small and medium), and carrying case.

- Quick application and removal
- X-ray translucent/MRI compatible
- Wipes clean for reuse
- Folds for compact storage

AE-1115

Sager Form III Splints

AE-1110 Sager Form III Complete with Case, $665.00

AE-1115 Sager Form III Bilateral Complete with Case, $945.00

Like all Sager Splints, Form III Splints allow the continuous documentation of traction force applied – Quantifiable Dynamic Traction. The tough ischio-perineal cushion base, combined with the slender, anatomically-shaped cushion, mean that perineal examinations and procedures may be performed with the splint in place. Extra-wide leg cushion provides improved comfort and immobilization. For ages four and up.

EM-700

Sam® ThoraSite®

EM-700 Sam® ThoraSite®, 5/pkg., $80.00

ThoraSite is an anatomical landmark guide designed to provide a safer approach to the pleural space by pinpointing the procedure site. The device aids in identifying the appropriate intercostal space for lateral thoracostomies and similar procedures. The principle utilizes two axes to create an intersection to safely orient the device. The first axis positions ThoraSite accurately between the anterior axillary and midaxillary line, while the second aligns the window over the 3rd, 4th, or 5th intercostal space. This easily guides the user over the appropriate site to vent.

ThoraSite is non-sterile and intended to be single use.

AE-1105

Infant Sager Splint

AE-1105 Infant Sager Traction Splint, $795.00

The AE-1105 fits an inseam of 8" to 24". Single or bilateral application.

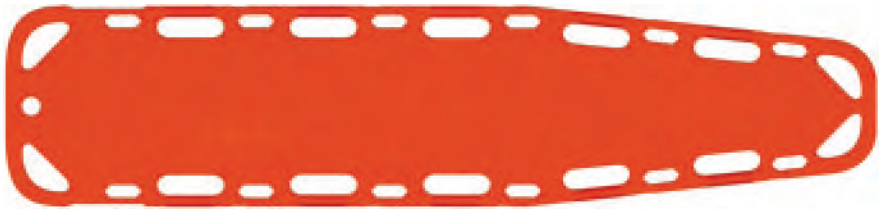
Quantifiable Dynamic Traction: the traction decreases as the spasm releases and prevents excessive traction. Dorsalis pedis and posterior tibial pulses are accessible. No heel stand and no risk of sciatic nerve compression. For ages six and under.

X-ray Translucent Boards and Extrication Collars

Ultra-Vue

AE-585P (yellow), AE-585-OP (orange), AE-585-BP (blue), Ultra-Vue Board with Pins, $195.00
AE-585 (yellow), AE-585-O (orange), AE-585-B (blue), Ultra-Vue Board, $180.00

- Weight rating: Approximately 1,100 lbs.
- 250 lbs. float capacity
- Size: 16"W x 72"L, $1\frac{3}{4}$" thick; 15 lbs.
- X-ray translucent, MRI and CT scan compatible
- Flat patient surface won't compromise CPR efforts or aggravate cervical spine injuries



AE-585-O

Backboard Straps

All clips and buckles are metal.

AE-545 Two-piece Black 5' with Swivel Speed Clip, $28.00
AE-549 Two-piece Black 7' with Swivel Speed Clip, $28.00
AE-546 Two-piece Black 5' with Buckle, $20.00

Stifneck® Select™

AE-3015 Stifneck Select Adjustable Extrication Collar, $19.00
AE-3016 Stifneck Pedi-Select™ Adjustable Extrication Collar, $19.00

Four collars in one: The Stifneck Select adjusts to match the four adult Stifneck sizes (Regular, Short, Tall, and No-Neck™), so it's the only adult collar you need.

- Minimizes inventory and storage requirements
- Rear panel opens to allow C-spine palpation and visualization
- Large trachea hole for pulse check and airway procedures
- Radiolucent; MRI and CT compatible
- Adjustment tracks ensure selected size stays in place

SAM® Pelvic Sling II

AE-1886 SAM Pelvic Sling II, Small, $85.00
AE-1885 SAM Pelvic Sling II, Standard, $85.00
AE-1887 SAM Pelvic Sling II, Large, $85.00

Low-Friction Posterior Slider: Easier transfers following severe trauma made possible by low-friction materials covering backside of the pelvic sling.

SAM® Autostop Buckle: Tactile and audible "click" provides clear feedback, confirming proper application and preventing over-tightening while maintaining optimal force.

Precision Strap: Precisely-engineered holes lock with AUTOSTOP Buckle, allowing for quick application. Secure fastening with sturdy hook and loop strap.

Tapered Design: Narrow and tapered front facilitates urinary catheterization, interventional radiology, external fixation, and abdominal surgery without removal.

Radiolucent Material: All materials are radiolucent except the buckle's two stainless steel springs, allowing X-rays and CT scans without removal.

AE-1695 Morgan Medi-Flow Lens, Sterile, 12/case, $575.00

For immediate relief of pain and definitive treatment of:

- Ocular trauma and infection
- Foreign body sensation
- Operative and pre-operative procedures

The Morgan Lens makes difficult ocular irrigation and lavage safe, simple, and effective. Early insertion of the Morgan Lens can prevent permanent ocular damage and a months of unnecessary suffering.

The Morgan Lens eliminates the need for constant supervision during irrigation or lavage.

The Morgan Lens is currently used in over 4,000 emergency departments and is successful in treating hundreds of thousands of ocular injuries.

The lens, tubing, and adapter are sealed in individual peel-open packages with instructions for use printed on the front. Disposable units are sterile and ready for use.

The lens is made of soft, low-density polyethylene.

AE-1697 Medi-Duct, 12/pkg., **$110.00**

Optional Medi-Duct is an ocular fluid-management system designed for use with the Morgan Lens. When the lens is attached, solutions are carried away from the patient for easy collection.

For insertion, instill topical anesthetic. Attach syringe for lavage of I.V. set for continuous flow, using solution and rate of choice. Start the solution flowing.

Have patient look down. Insert edge of the lens under the upper lid. Have the patient look up and retract the lower lid.

Release lower lid over the lens and continue flow. Tape tube and adapter to patient's forehead to prevent accidental lens removal. Absorb outflow.

For removal, have patient look up. Retract lower lid behind interior border of the lens and hold position. Have patient look down, retract upper lid, and slide lens out.

Morgan Lens® Delivery Set

AE-1696 Morgan Lens Delivery Set, 6/box, $75.00

The Delivery Set makes using the Morgan Lens even easier. It is no longer necessary to jury-rig separate I.V. set-ups to irrigate two eyes at the same time. Now, the lenses are simply connected to the Delivery Set and inserted using the normal procedure. The Morgan Lens Delivery Set provides the speed and efficiency needed when a patient's vision is on the line. The Morgan Lens is sold separately.

Emergency Supplies

Glove Dispensers

AGB-1 Cart-mount Glove Box, Beige, $77.00
5.75"W x 10"H x 3 7/8"D.

AGB-3 Steel, Baked-on Enamel Glove Box, Beige, $105.00
16"W x 10"H x 3 7/8"D.

AD-700 Fingertip Digital Pulse Oximeter, $70.00
AD-701 Lanyard, $4.10
AD-702 Bumper, Black, $6.00
AD-704 Bumper, Orange, $6.00
Reads SpO_2 and pulse rate. Has 6 display modes and visible and audible alarms.

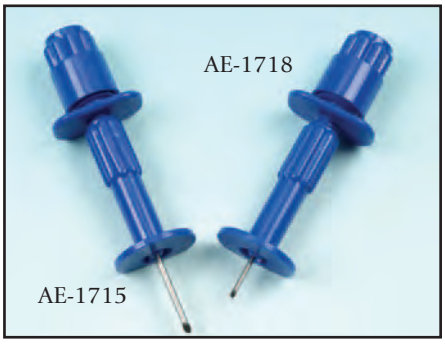
AD-705 Admirals™ Pediatric Fingertip Digital Pulse Oximeter, $70.00
- Reads SpO_2 and pulse rate
- Accuracy: SpO_2 +/-3%; HR +/-2 BPM
- Six changeable display modes
- Fits fingers with thickness of 0.2-0.63"

EM-820 Penlight, 6/pkg., $9.99
EM-800 Ring Cutter, $26.35

AE-2000 Economy Emergency Scissors, Black, $3.95

Visit Our Website At
www.armstrongmedical.com

AE-2002W White, $5.95
AE-2002Y Yellow, $5.95
AE-2002NP Neon Pink, $5.95
AE-2002V Purple, $5.95
AE-2002O Orange, $5.95
AE-2002B Blue, $5.95
AE-2002R Red, $5.95
Hardened, surgical steel blades with one serrated edge. Can be autoclaved. 7 1/4"L.



AE-1715 JAMSHIDI® Disposable Illinois Sternal/Iliac Aspiration Needle, 15 Gauge, $33.00
15 gauge adjustable length: 3/8" - 1 7/8"

AE-1718 JAMSHIDI® Disposable Illinois Sternal/Iliac Aspiration Needle, 18 Gauge, $33.00
18 gauge adjustable length: 9/16" - 1 1/2"

AE-4704

AE-4704 Empty Broselow® Bag *(outer shell only)*, $440.00
Outer shell only ("Flying Carpet" not included).

18"L x 11 1/2"H x 12 1/2"D.

AE-4825

Broselow®

AE-4825 Mini Broselow® Equipment Organize, $385.00
Seven empty color-coded bags permanently attached to "Flying Carpet" cloth.

Main bag: 15"L x 10"H x 6 1/2"D.
Pouches: 12"L x 5"H x 2"D
Flying Carpet: 30"L x 12"W

AE-4805

AE-4805 Broselow® Pediatric Emergency Equipment Organizer, $640.00
Seven empty color-coded bags attached to Velcro® "Flying Carpet" cloth. Includes airway management equipment bag.

Main bag: 18"L x 11 1/2"H x 12 1/2"D.
Airway bag: 14"L x 9"H x 4 1/2"D empty.
Pouches: 14"L x 8"W.
Broselow® Tape and other supplies not included.

AE-4800 Broselow™ Pediatric Emergency Tape, 5/pkg., $130.00

See pages 64-68 for a complete description of the innovative Broselow® Pediatric Resuscitation System.

AE-1294

AE-1294 Soft Tri-Pocket Case, Orange, $220.00
AE-1294B Blue Case, $220.00
The ideal disaster case. Adjustable compartments and removable interior provide rapid, organized access to equipment and supplies. Three pockets are perfect for adjuncts. Three-way carry with back pack, shoulder strap, or hand strap. 20"L x 15"W x 9"H.

AE-1291

AE-1291 Standard Trauma Bag, Orange, $100.00
Cordura® bag has Snaploc™ buckles for easy access. Interior tool holders and separate compartments keep equipment in place. Two wing pouches and dual pockets hold accessories. Includes shoulder strap. 17"L x 9"W x 7"H.

AE-1250BV

AE-1250BV Vinyl Intubation Case, Blue, $85.00
AE-1250V Vinyl Intubation Case, Orange, $85.00
(not shown)

Case rolls and fastens in a tight bundle. Holds twelve endo tubes, a full set of oral airways, and a laryngoscope handle with four blades; or equipment of your choice. Unrolled dim.: 25" x 14".

See page 80

Armstrong Trauma Cases

AE-1230B

AE-1230B Trauma Pack, Blue, $213.00
AE-1230 Trauma Pack, Orange, $213.00
Cavernous, zippered main compartment and four full-size exterior pockets. Front pocket opens to reveal generous tacked elastic, full-length interior pocket, and three large vertical pockets.

Size: 19"L x 14"W x 12"H

AE-1246

AE-1246 AED/Oxygen/Trauma Backpack Plus, $433.00
Heavy-duty construction and task-specific design ensures that this backpack delivers ease of transport and efficient deployment of AED, Oxygen, and Trauma supplies, all while keeping a slim profile. Features 1,000 denier nylon construction with all metal hardware, padded handles, and fluid-proof bottom.

Size: 21 1/2"H x 13 1/2"W x 11"D

AE-1289

AE-1290 "D" Oxygen Bag, $151.00
AE-1289 "E" Oxygen Bag, $182.00
Zippered bag provides immediate access to the tank, which is protected by durable padding. Contains mesh pocket to hold oxygen supplies.

"D" bag: 21"L x 8 1/2"W x 8 1/2"H
"E" bag: 32"L x 8 1/2"W x 8 1/2"H

AE-1240

AE-1240 Breathsaver Oxygen Bag, Type "D" Cylinder, $239.00
AE-1240LF Latex-Free Breathsaver Oxygen Bag, Red, Type "D" Cylinder, $263.00
One of the most popular airway management bag in the industry. Fold-back lid has gusseted pocket with clear window. Padded main compartment holds "D" or "Jumbo D" tank. Fluid-proof Bottom casing extends up the sides for added protection. Has two full-length side pockets and one end pocket.

Outside Dim: 26"L x 13"W x 12"H

AE-1245

AE-1245 Laryngoscope Bag, Royal Blue, $55.00
Padded case spreads completely open for quick access to blades, handles, and tubes.

Size: 14"L x 1 1/2"W x 10"H (closed)

AE-1242

AE-1242 Ultra Softbox Plus Trauma Bag, Orange, $332.00
Features a large, semi-rigid main compartment with four removable dividers. A gusseted pocket with clear window in the lid holds loose equipment or the optional AE-1243 Ultra Meds Pack. Also includes four full-size, exterior pockets.

Size: 22"L x 14"W x 12"H

Please Note: Supplies shown are not included.

Laerdal™ Pocket Mask™

AE-5000 Pocket Mask with Filter and One-way Valve, $18.50
AE-5075 Pocket Mask with Oxygen Inlet, Head Strap, Filter, and One-way Valve, $25.75
82 04 10 One-way Valve, **$12.40**
82 06 10 Filter, **$7.30**

Laerdal™ Pediatric Pocket Mask

AE-5100 Pediatric Pocket Mask with One-way Valve and Blue/Yellow Soft Pack, $21.00
82 04 10 One-way Valve, **$12.40**

Resusci® Manikin Face Shields
15 12 01 Resusci Manikin Face Shields, 6 Rolls of 36, $103.00

AE-550 CPR Backboard, $100.00

High-density, polyethylene backboard offers firm surface for administering CPR. 16"W x 23 1/2"L.

AA-6090 Kneeling Pad, 6/box, $120.00

Poly foam pad for CPR practice. 12" x 24" x 1 1/2".

Anti Choking Trainer

AA-6080 ActFast™ Anti Choking Trainer, Red, $149.00

AA-6082 ActFast™ Anti Choking Trainer, Red, 4/pkg., $498.00

AA-6085 ActFast™ Anti Choking Trainer, Blue *(no back pad)*, $139.00

AA-6087 ActFast™ Anti Choking Trainer, Blue *(no back pad)*, 4/pkg., $468.00

AA-6095 ActFast™ Anti Choking Pediatric Trainer, $119.00

The training vest can be used in a variety of positions to create realistic scenarios, including: standing, sitting and laying on the ground. Also, it allows the student to practice self rescue, using a counter top or chair.

- Transparent PVC airway allows user to see release of obstruction.
- Large easy snap buckles with adjustable straps. One size fits all.
- Back Pad *(Red only)* crumple zone for practicing back blows.
- Navel aids in correct hand placement.

Prepare For The Worst

Terry Trauma Manikin™

AA-7200 Terry Trauma Adult Trauma and CPR Manikin, $1,860.00
AA-7570 Soft Carrying Case, **$315.00**

Complete with burns, lacerations, and broken bones, Terry Trauma offers realistic experience in identification, assessment, treatment, and transport of disaster victims. His flexible joints make him perfect for any kind of rescue, extrication, immobilization, or restraint.

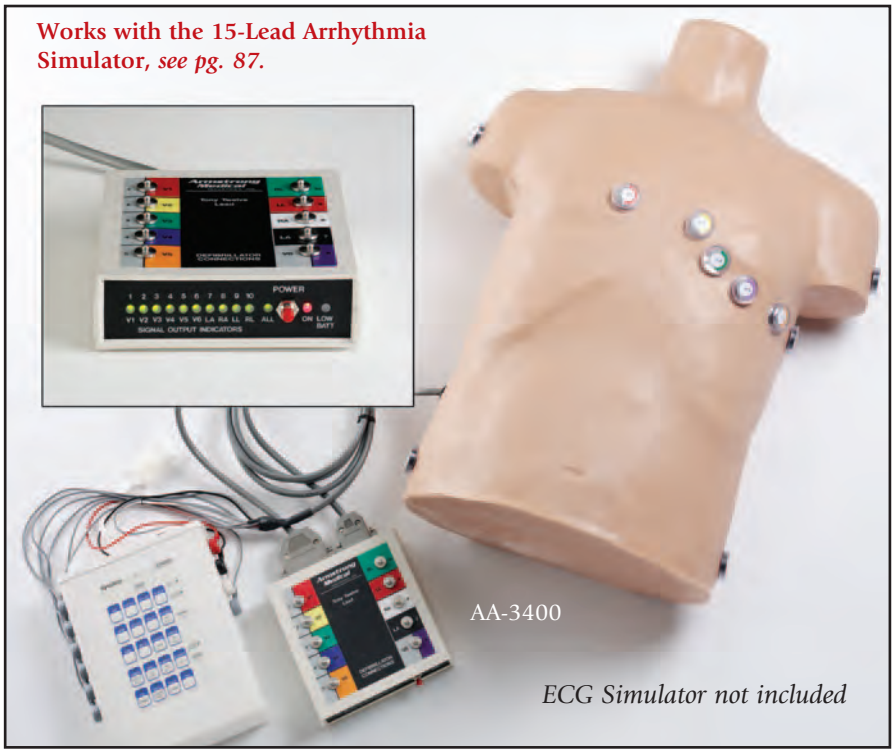
Terry comes with two heads, a rigid rescue head and a second head for sanitary CPR training. He also includes twelve moulage pumps, simulated blood, make-up blood, CPR faces, airways and lungs, a chest/skin overlay, and clothing. Weighs 35 lbs.

Use any of the following wounds for a custom disaster scenario:

AA-7200

- ✔ *Sucking chest wound*
- ✔ *Forehead and forearm lacerations*
- ✔ *Broken clavicle with seat belt contusion*
- ✔ *2nd and 3rd degree burns of the face, hand, forearm, chest, and back*
- ✔ *Protruding intestines*
- ✔ *Compound fractures*
- ✔ *Jaw wound*
- ✔ *Projectile entry and exit on arm*
- ✔ *Impalement of the lower leg*
- ✔ *Crushed foot*

Works with the 15-Lead Arrhythmia Simulator, *see pg. 87.*



AA-3400

ECG Simulator not included

Twelve-Lead ECG Placement Trainer

AA-3400 Twelve-Lead ECG Placement Trainer, $1,535.00

A replica of a human thorax, this manikin has all appropriate landmarks necessary to train students in proper placement of ECG leads. Using reusable, color-coded magnets for leads, students learn correct placement as the appropriate LED lights up. A lighted signal also indicates when all leads are placed correctly.

The AA-3400 can be used with a rhythm simulator to enhance training by adding ECG readings that can be viewed on your monitor or printed on your twelve-lead ECG machine.

Visit Our Website At
www.armstrongmedical.com

15-Lead Arrhythmia Simulator

AA-701 15-Lead Simulator, Zoll, $860.00
AA-702 15-Lead Simulator, Physio Control Quick Combo, $865.00
AA-703 15-Lead Simulator, Philips, $860.00

Acquire 15-lead STEMI recordings with your standard 12-lead ECG monitor. Three new pre-cordial ECG snaps allow for direct viewing of the right ventricle - through V4R - and of the posterior ventricle - through V8 and V9. STEMI rhythms include: Inferior, Inferior with right ventricular STEMI, Inferior with posterior STEMI, Anterior, Antero-septal, Antero-lateral and Anterior with RBBB.

AA-702

Observe progression of T wave, ST segment and Q wave changes during STEMIs. Each STEMI can be displayed in one of three phases: hyperacute (broad, peaked T waves), acute (ST elevation) and post-acute (pathological Q waves).

Differentiate STEMIs from imposters. Common rhythms with characteristics that mimic STEMI but are not STEMIs include: LBBB, LVH, pericarditis and W-P-W.

Discharge your defibrillator directly into the simulator. Use "convert" feature to convert automatically to another rhythm after defibrillation. Useful fibrillations and tachycardias include: VFib, VTach fast, VTach slow, SVT, Sinus Tach, AFib and AFlutter.

Simulate paced beats with your external pacer. Select one of five pacing capture levels: 70, 80, 90 or 100 mA, or "ignore". When your pacer's current and rate are properly adjusted, paced beats are displayed. Useful bradycardias include: Sinus Bradycardia, 2nd degree type I AV block, 2nd degree type II AV block and 3rd degree AV block.

Uses four AA alkaline batteries. Three-year warranty.

Interactive ECG/Pacing Simulator

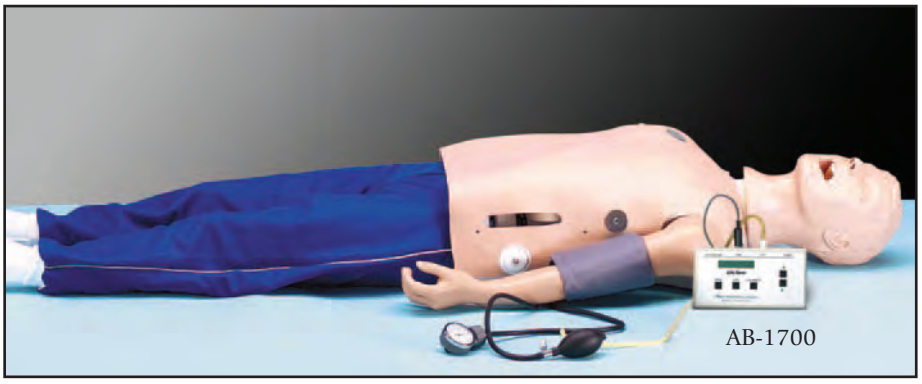
AA-550 Interactive ECG/Pacing Simulator, $1,268.00

This simulator combines defibrillator and external pacer training features with adult and pediatric ECG rhythms. Built-in circuitry allows users to practice defibrillation and external pacing with or without a manikin*. The simulator features seventeen adult and pediatric rhythms for pacing on any defibrillator. It has the ability to automatically convert from one rhythm to another when defibrillated. Uses one 9V battery.

AA-550

** Extra adapter may be required.*

Z02 Zoll Defib Pad Adapter, **$259.00**
Z10 Physio Quick Combo Defib Pad Adapter, **$259.00**
Z13 Philips MRx Defib Pad Adapter, **$259.00**



AB-1700

CRiSis™ Patient Manikin

AB-1700 CRiSis Patient Manikin, Complete System, $6,588.00

- CRiSis Manikin with Airway Larry® airway management head
- I.V. training arm
- New and improved blood pressure arm
- Defibrillation chest skin

Intubation Trainers

Child Intubation

AA-3025 Three-Year-Old Airway Intubation Head with Carrying Bag, $1,099.00

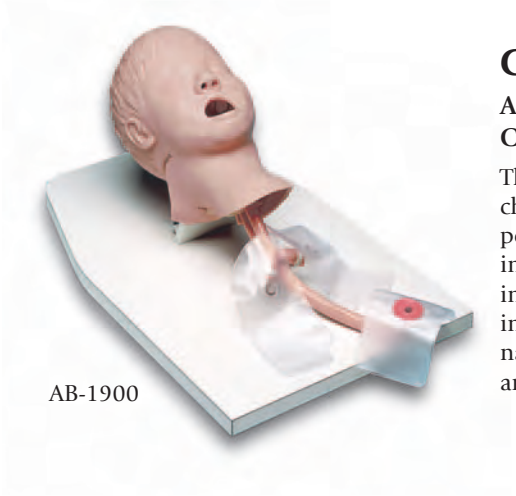
AA-3025 features both realistic size and anatomy for training and practicing airway management skills on a child. Quality and affordability make the AA-3025 indispensable for training.

Manikin head comes with lubricant and a carrying bag.

Equipment Sizes:
- Laryngoscope Blade: #2
- Endotracheal Tube: 3.5 mm
- Nasotracheal Tube: 2.5 mm

Features:
- Landmarks include uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, esophagus, inflatable lungs, and stomach
- Vocal cords, highlighted in white, provide easy laryngoscope viewing

AA-3025



AB-1900

Child Airway Management Trainer

AB-1900 Eight-Year-Old Child Airway Management Trainer with Hard Case, $1,167.00

This anatomically correct, eight-year-old child manikin is perfect for practicing pediatric airway management skills, including oral, digital, and nasal intubation, and suction. Landmarks include nostrils, teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false and true cords, cricoid ring, tracheal rings, trachea, esophagus, lungs, and stomach.

Equipment Sizes:
- Laryngoscope Blade: #2
- Endotracheal Tube: 4.5 mm
- Nasotracheal Tube: 3.0-3.5 mm

Laerdal™ Infant Intubation Model

AA-3200 Laerdal Infant Intubation Model with Spray Lubricant and Protective Cover, $1,049.00

Features realistic oropharynx, tongue, epiglottis, larynx, vocal cords, trachea, and a detachable tongue and airway set that allows for simple replacement of these parts. Correct tube placement can be visually checked via the transparent trachea or the practical inflation test. Represents a three month old.

Equipment Sizes:
Laryngoscope Blade: #1
Endotracheal Tube: up to 4.0 mm

AA-3200

AA-3250

Laerdal™ Neonatal Intubation Trainer

AA-3250 Neonatal Intubation Trainer, $853.90

The Neonatal Intubation Trainer provides practice of intubation skills on a newborn baby. Robust and realistic, this model allows students to undertake training that is directly transferable to the clinical setting.

- Realistic anatomy
- Oral and nasal intubation
- Bag valve mask ventilation
- Correct tube placement can be checked by practical inflation tests

Armstrong Intubation Manikin

AA-3000 Armstrong Adult Intubation Manikin with Case, $1,285.00

AA-3000

The Adult Intubation Manikin's head extends for correct positioning, the lungs have a realistic compliance, and the skin is soft.

Practice bag valve mask ventilations, oral or nasal intubation, EOA, Combitube®, and other airway management techniques. Works well with curved or straight laryngoscope blades. Comes with realistic cricoid cartilage (for cricoid pressure) and realistic teeth. Laryngospasms can be simulated.

Manikin features oral pharynx, tongue, epiglottis, vocal cords, stomach, trachea, right and left bronchus, esophagus with stomach, articulating jaw, upper and lower teeth, bilateral nasal passages, and soft face skin.

AA-3000L Lungs and Stomach, 3/pkg., **$90.00**

Larry Intubation Trainer

AB-1875

AB-1875 Larry Head with Mounting Board, $1,385.00
Includes mounting board, case, and lubricant.
AB-1830 Larry Torso Manikin *(not pictured)*, **$1,914.00**
Disposable lower airway, case, and lubricant.
AB-1870 Larry Head only *(not pictured)*, **$979.00**

- Find more tracheal space for improved maneuvering
- Apply cricoid pressure, change the position of the trachea, and close the esophagus in order to practice the Sellick maneuver

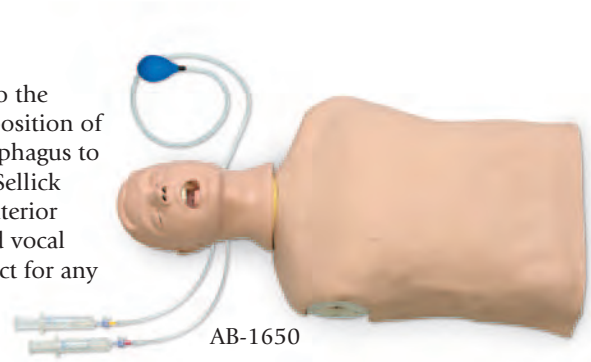
Attaches to either CPARLENE® or Resusci® Anne™ CPR manikins.

Advanced Larry Intubation Trainer

AB-1650 Advanced Larry, $1,961.00
AB-1655 Advanced Larry Head with Stand, $1,612.00

These trainers offer tongue swelling and laryngospasms in addition to all the features of the standard models *(see above)*. Advanced Larry simulates a non-anesthetized patient for practicing intubation, ventilation, suction, and CPR techniques. Practice oral, nasal, and digital intubation, as well as ET, EOA, PTL, LMA, EGTA, and Combitube®

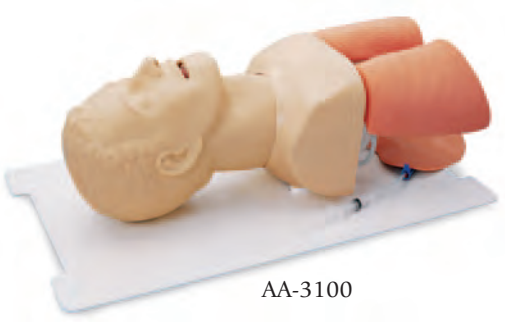
insertion. Applying pressure to the cricoid cartilage changes the position of the trachea and closes the esophagus to allow realistic practice of the Sellick maneuver. With its slightly anterior position, swelling tongue, and vocal cords, Advanced Larry is perfect for any level of training.



AB-1650

Laerdal™ Airway Management Trainer

AA-3100 Laerdal Airway Management Trainer, $3,190.00



AA-3100

Includes mounting board, separate larynx model, spray lubricant, sanitation kit, and hard case. Simulates a non-anesthetized patient for teaching intubation, ventilation, and suction.

Intubation: Practice esophageal, bronchial, oro- and naso-tracheal, and oro- and naso-pharyngeal intubation. Features full-range head motion and a complete realistic airway anatomy. Tube placement can be checked by visual inspection of lung expansion during ventilation, auscultation of breath sounds, or bronchoscopic evaluation of tip position.

Ventilation: Allows practice for correctly establishing an open airway. Manual or mouth-to-mask resuscitators can be used.

Foreign Body Removal: Practice oropharyngeal and tracheal suctioning.

Procedure Trainers

Chester Chest™ with Port Access Arm

AA-9800 Chester Chest with Port Access Arm, $1,055.00

Life-size torso model for teaching and practicing the most common, long-term vascular access routes.

- Implanted ports
- External central catheters
- Peripheral central catheters

Chester Chest has three accessing inserts.

- Tilting/tipping ports
- Wandering/shifting ports
- Deeply placed ports

Practice fluid infusion, blood withdrawal, subclavian and external jugular line placement, and heparinization.

AA-9801 Case for Chester Chest, **$102.00**

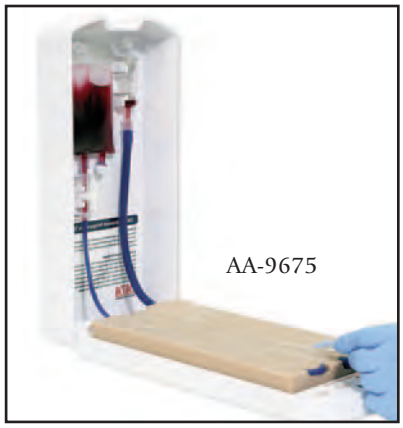
405 Replacement Chest Skin for Chester Chest, **$137.00**

AA-9806 Replacement Arm with Single Lumen Port, **$354.00** ***(shown)***

410 Optional Triple Lumen Port, **$84.00** ***(shown)***

454 Optional Connector, **$28.50** ***(shown)*** ****Required if ordering 410.***

AA-9800



AA-9675

Advanced 4-Vein Venipuncture Training Aid

AA-9675 Advanced 4-Vein Venipuncture Training Aid, $391.00

Practice venipuncture techniques and "no stick" I.V. catheter placements.

The latex-free Arm Pad features realistic blue veins below a tissue-like pad. The Arm Pad's skin rolls when the vein is palpated. Veins are present in three different sizes and occur at various depths.

Increase difficulty of procedure and thus improve skills.

This lightweight, portable, economical, non-staining training model is an excellent alternative to larger, heavier, more expensive models.

Peter PICC™

AA-9815 Peter PICC™ Central Catheter Line Insertion Simulator with Soft Case, $944.00

The only teaching model that allows the practice of placing peripherally inserted central catheter lines (PICC lines).

Model features anatomically correct cephalic, basilic, median basilic, jugular, subclavian, and superior vena cava. Also features a movable chin to simulate occlusion of the jugular to prevent the PICC line from taking this route.

Standard I.V. catheter placement is also possible with Peter PICC.

Measure proper catheter length using palpable ribs or measure catheter length outside the body. Confirm proper placement by viewing distal tip of the catheter in the viewable superior vena cava. Identify underlying veins below the replacement skin.

AA-9815

Ultrasound device not included

Ultrasound Phantom

AA-9825 Ultrasound Phantom, $484.00
AA-9826 Simulated Blood, 8 oz., **$32.00**

The phantom provides unmatched training opportunities for ultrasound guided vascular accessing. Prefilled with stain resistant blood, this model also contains three different sized vessels for additional learning.

- Can be accessed numerous times and is self healing
- Realistic movement of soft tissue can be observed as needle tip enters the vessel
- Flesh toned, curved contour helps transducer positioning

I.V. Arm Trainers and Pneumothorax Simulator

AB-1000

I.V. Arm

AB-1000 I.V. Arm, Caucasian, $876.00
AB-1001 I.V. Arm, African-American, $876.00

Realistic skin rolls as you palpate the vein and the characteristic "pop" can be felt as the needle penetrates the vein. Multiple access points allow practice for drawing blood, intramuscular injections, I.V. catheter insertions, and infusions. Comes with a soft carrying case.

AB-1002 Replacement Skin and Vein Kit, Caucasian, **$240.00**

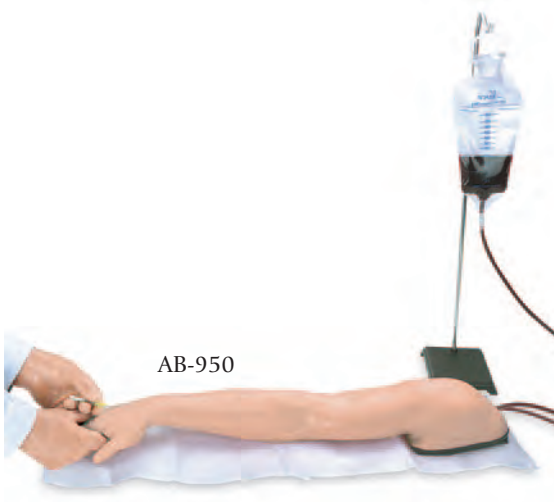
I.V. Arm and Hand

AA-4340 I.V. Training Arm and I.V. Training Hand, $792.00

This is a fully functional I.V. training arm and hand. The student can palpate the arm and hand, which are made of a supple, resilient, lifelike skin. The vein can be located, the needle introduced, and then blood withdrawn or fluid injected. Simulated blood and a carrying tray are included.

AA-4346 I.V. Arm Only, $469.00
AA-4347 I.V. Hand Only, $470.00
141R Skin for Right Hand, **$104.00**
142 Skin for Arm, **$88.00**
143 5-ft. Vein for Hand and Arm, **$46.00**
144 I.V. Reservoir, **$25.00**
225 Blood Powder (for 1 gallon), **$30.00**

AA-4340



AB-950

Advanced Injection Training Arm

AB-950 Advanced Injection Arm, Caucasian, $1,018.00
AB-951 Advanced Injection Arm, African-American, $1,018.00

Includes simulated blood, two syringes, two fluid bags, a manual, and a case.

Complete venous access includes basilic, cephalic, accessory cephalic, median cubital, dorsal metacarpal, digital, and more. Blood flows to all injection points simultaneously from a single fluid bag. Soft, flexible fingers, wrist, and skin make for excellent realism.

LF-1122U Replacement Skin and Vein Kit, Caucasian, **$304.00**

LF-1123U Replacement Skin and Vein Kit, African-American, **$304.00**

Pneumothorax Simulator

AA-9500 Pneumothorax Simulator, $987.00

This simulated torso helps emergency personnel learn the life-saving techniques associated with pneumothorax injuries.

- Life size
- Features rib cage, liner, and vinyl skin
- Ideal for PHTLS and EMT-P classes
- Excellent review for ER, OR, or ICU

The pneumothorax simulator includes a pump assembly for lung inflation, a dual lung, a rib cage, replaceable skin, and a carrying bag.

The self-sealing dual lungs may be punctured approximately 75 to 100 times each, allowing double usage from original and replacement lungs. Procedural needle is not included.

Replacement Parts:
1805 Replacement Lung, **$78.00**
1801 Outer Skin, **$209.00**

AA-9500

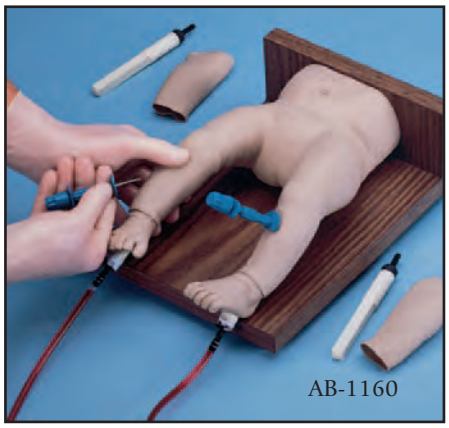
Training Simulators

Intraosseous Leg

AA-7310 Intraosseous Leg with Stand, $514.00

Intraosseous access to the proximal tibia is offered with the I/O Leg Adult STAT Simulator. Use the I/O Leg to enhance training and understanding of procedures associated with B.I.G.™ and EZ-IO™ devices. This I/O device is not fluid capable and no blood source is accessible through the injection site.

AA-7310



AB-1160

Intraosseous Infusion Simulator

AB-1160 Intraosseous Infusion Simulator, $1,069.00

The Intraosseous Infusion Simulator enables students to practice intraosseous infusion with incredible accuracy and realism.

Provides a very accurate and consistent simulation of procedure. Due to the innovative bone design, students can palpate landmarks and puncture each bone. To decrease replacement costs, bones have been designed so all four sides can be punctured multiple times. Includes a case, ten bones, two pairs of replacement leg skins, and accessories.

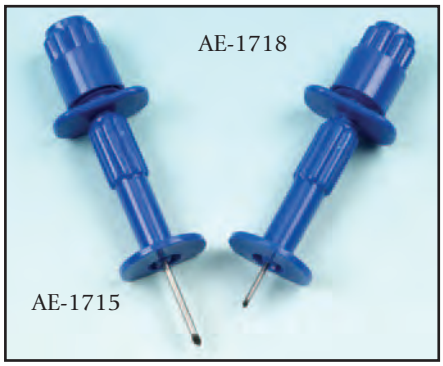
AB-1161 Replacement Bones, 10/pkg., **$252.00**
Each side of the four-sided bone can be punctured approximately 4-6 times.

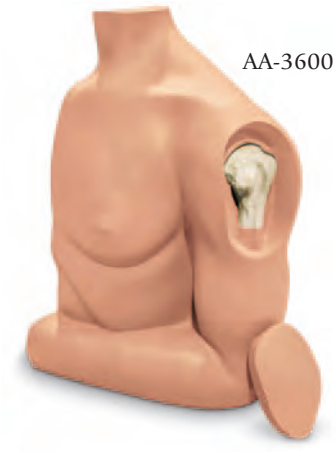
AB-1162 Replacement Skins, 4/pkg. (2 pair), **$150.00**

Aspiration Needles

AE-1715 JAMSHIDI® Disposable Illinois Sternal/Iliac Aspiration Needle, 15 Gauge, $33.00
15 gauge adjustable length: $\frac{3}{8}$" - $1\frac{7}{8}$"

AE-1718 JAMSHIDI® Disposable Illinois Sternal/Iliac Aspiration Needle, 18 Gauge, $33.00
18 gauge adjustable length: $\frac{9}{16}$" - $1\frac{1}{2}$"



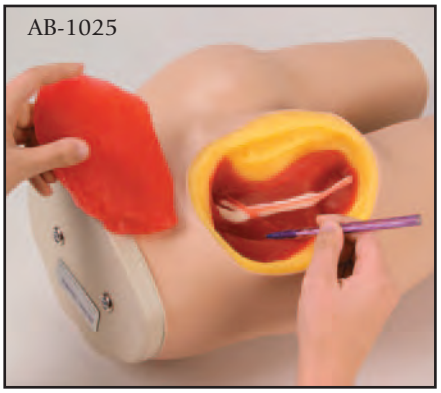


AA-3600

Humerus Intraosseous (IO) Trainer

AA-3600 Humerus Intraosseous (IO) Trainer, $560.00
AA-3603 Replacement Injection Pads, 3/pkg., **$151.00**

The Humerus IO Trainer is the perfect tool to train the access procedure for fluid management. Humerus access is now accepted as the best alternative when IV access cannot be obtained. This trainer presents three orientations that can be demonstrated to provide the correct simulation for application. The realistic trainer includes the correct hallmarks, which are needed to provide accurate and safe access for fluid administration. The trainer has an easy-to-access replacement bone section supporting rapid-fire training, while presenting the realism needed to make training effective.



AB-1025

Intramuscular Injection Aid

AB-1025 Intramuscular Injection Simulator, $1,006.00

This is the perfect volunteer for training health care students in the proper procedure for administering intramuscular injections. One buttock is shown dissected to reveal the major muscles, nerves, and vessels. The other side offers all the bony landmarks used to identify the desired gluteal injection area, including the superior end of the femur, the posterior and anterior superior iliac spines, and the sacrum. Lateral injections in the thigh can also be demonstrated and practiced.

Skin texture, muscle texture, bone shape, and position all realistically resemble a live patient. Perforation of the tissue with a needle replicates the feeling of administering an actual injection.

Includes syringes, a teaching guide, and a carrying case.

Wound Care Simulator

AA-9680 Seymour II Wound Care Simulator, $644.00
AA-9681 Optional Carrying Case**, $101.00**

All four stages of pressure ulcers are displayed, some with the additional complications of undermining, tunneling, sinus tract, slough, infection, and exposed bone. Also displayed are a suspected deep tissue injury, unstageable full eschar/slough wound, and a 5 1/2" dehisced wound. The Stage 3 and Stage 4 are positioned so that a "bridging" dressing for use with a vacuum assisted closure and negative pressure wound therapy devices can be demonstrated and practiced. You are also able to demonstrate and practice wound cleansing, classification, staging, and assessment, as well as the measuring of wound length, depth, undermining, and tunneling.

AA-9680

AA-4615

Deluxe Casualty Simulation Kit

AA-4615 Deluxe Casualty Simulation Kit, $1,184.95

The Deluxe Casualty Simulation Kit contains seven bleeding strap-on wounds and fifteen never before seen moulage stick on wounds. The full line of accessories allows you to create seventy individual wounds. Wounds include lacerations, fractures, burns, projectile entry, and much more. You can then use the included make up to create realism in your evolutions. The kit comes packaged in a carry case and contains instructions.

Casualty Simulation Kits

AA-4600 EMT Casualty Simulation Kit, $1,671.95

This kit contains everything necessary to stage incredibly realistic casualty scenarios. This 95-piece kit has burns, lacerations, compound fractures, gunshot wounds, eviscerations, and amputations. It also includes several varieties of make-up, simulated blood, and adhesives, so any injury can be represented. Packed in a rugged carrying case.

AA-4625 Multiple Casualty Simulation Kit, $609.95

This budget-conscious alternative is a toned down version of the EMT Casualty Simulation Kit. It is designed for intermediate and advanced first aid courses. It features compound fractures, an open amputation, a sucking chest wound, a gunshot wound, lacerations, simulated blood, adhesives, grease paint, reservoirs and pumps, sprayer, and an instruction guide.

AA-4600

X-Ray Positioning Manikin

X-Ray Positioning Manikin

AA-7800 X-Ray Positioning Manikin, $17,450.00
AA-7570 Manikin Storage Soft Case, **$315.00**

The X-Ray Positioning Manikin allows students of radiography to repeatedly practice any standard projection without discomfort or danger to patients or themselves.

The manikin lies naturally in the neutral, prone, or supine positions. With the use of positioning aids, it is possible to place the manikin in other postures for all standard projections.

This life-size, human figure contains a fully-flexible, articulated skeleton made of a specially formulated polyurethane for realistic x-rays. No metal parts have been used in the articulation of the skeleton. The skin surface and internal organs (heart, larynx, lungs, and kidneys) are constructed of radiolucent materials.

The manikin can be positioned and for a whole body CT investigation. Good images in terms of body outline can be obtained. Certain areas of the skeleton structure e.g. thoracic vertebrae and the head of the femur gave similar values to the typical patient. **NOTE: As the manikin is very different from the human body in terms of attenuation, it cannot be used for training in or practice of exposure control.**

Manikin weighs approx. 30 lbs.

Life-Size Human Figure

Geri™ and Keri™

AB-2400 Geri Geriatric Manikin, $2,624.00
AB-2500 Keri Age-Generic Manikin, $2,624.00

Realistic, Full-Featured Geriatric and Nursing Manikins

More Than Thirty-Five Procedures Can Be Practiced

- **Procedures**
  Urinary catheterization, enema administration, douching, eye and ear irrigation, intramuscular injection, oral and nasal lavage, gavage, and suctioning.
- **Care**
  Ostomy care, tracheostomy care, hair washing, patient transfer and positioning, denture removal, hearing aid removal and insertion, bed baths, and clothing changes.
- **Superior range of motion**
  Trunk, shoulders, elbows, wrists, fingers, neck, hip, knees, ankles, and toes all bend and flex realistically. Each manikin weighs 27 lbs.
- **Exams**
  Prostate exam, pap smear, visual inspection of ulcers and moles, and dilated pupil comparison.

AB-2400

Geri™ and Keri™ with Heart and Lung Sounds

AB-2405 Complete Geri Manikin with Heart and Lung Sounds, $6,567.00
AB-2505 Complete Keri Manikin with Heart and Lung Sounds, $6,567.00

Same features as the Geri and Keri, plus these great heart and lung sounds.

Heart sounds include normal, holosystolic, systolic click, aortic regurgitation, mid systolic, atrial septic defect, mitral stenosis, S3 gallup, PDA, pulmonary stenosis, S4 gallup, and VSD.

Lung sounds include normal, rhonchi crackle, bronchial, egophony, wheeze, stridor, pulmonary edema, mono wheeze, coarse crackle, friction rub, fine crackle, cavernous, and pectoriloquy.

IV Arm for Geri™ and Keri™

AB-1000M IV Arm for Geri and Keri, $956.00

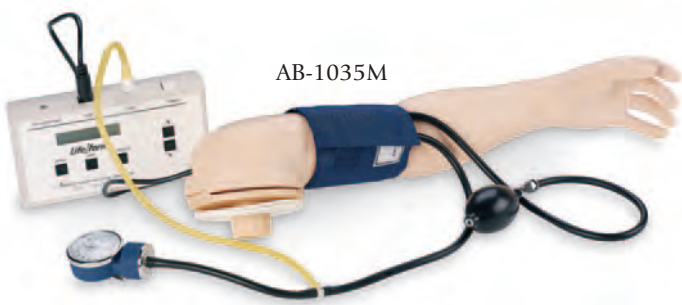
Features replaceable skins and latex veins that actually roll when palpated. A realistic flashback confirms proper needle placement, and the shoulder can be used for intramuscular injection training.

AB-1000M

Blood Pressure Arm for Geri™ and Keri™

AB-1035M Blood Pressure Arm for Geri and Keri, $1,698.00

Reproduces the five Korotkoff sounds and allows the instructor to vary systolic and diastolic levels, pulse rate, volume, and auscultatory gap.



AB-1035M

Advanced Grandma Chase™

Advanced Training Manikin

AA-8501 Advanced Grandma Chase with Case, Gown, and Interchangeable Male/Female Genitalia, $2,848.00

Advanced Grandma Chase is the most comprehensive patient care manikin available. Designed specifically for nurse training programs, this lifelike, durable manikin allows high-quality practice and instruction. Advanced Grandma Chase offers all the realism of the Basic Grandma Chase manikin except tracheostomy, plus the added features below.

New Hands-on Training Features:

- Carotid pulse
- Full-functioning airway with tongue, epiglottis, esophagus, and trachea with vocal cords
- Right and left bronchus for assessing intubation skills
- Articulating jaw
- Chest compresses for CPR
- Intramuscular injection sites at the deltoids, right gluteal muscle, and at the thighs
- I.V. practice capability on right forearm and dorsal side of right hand
- Interchangeable male/female genitalia with full-functioning catheterization – voids fluids
- Enema capability
- Stomach reservoir
- Lightweight and portable with detachable arms and legs

AA-8505 Replacement I.V. Arm and Hand, **$450.00**
4024 Replacement Skin for I.V. Arm, **$140.00**
4026 Replacement Veins for I.V. Arm, **$38.45**

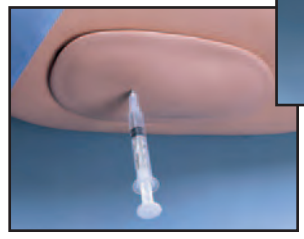
INCLUDES FREE MANIKIN SOFT STORAGE CASE!

Wheelchair and glasses are not included.

I.V. Practice

Airway Management

Ideal For Nurse Training Programs



Multiple Injection Sites

Please note that the walker is not included and the manikin cannot stand without support from personnel.

Grandma Chase™ was first developed by Dr. Chase around the turn of the century when a group of nurses asked him if he would create a training aid that they could use to teach patient care.

Today Grandma Chase™ has evolved into one of the most comprehensive patient care manikins and helps meet the ever changing challenges in training nursing students.

Practice stoma and ulcer care, hygiene, patient transfer, and other basic nursing skills on this versatile manikin.

Grandma Chase Patient Care Manikin

AA-8500 Grandma Chase, $1,495.00
Includes sweat suit and interchangeable genitalia in a carrying case.

Training Applications:

- **Patient transfer/handling**

Trains for changing occupied beds, changing patients' clothing, positioning in chairs and wheelchairs, transfer from bed to chair, assisting patients to bedside commode, prepping and positioning a patient for surgery, and assisted bedpan use.

- **Patient hygiene**

Trains for bed baths, flossing and brushing teeth, decubitus ulcer care, washing and combing hair, shaving, and fingernail care.

- **Other applications**

Trains for bandaging fingers and toes, administering liquid feedings, catheter insertion, and ostomy care.

Manikin Features:

- **Head and hair**

The neck is flexible. The grey hair can be shampooed and combed.

- **Nose and mouth**

Either can be used for stomach tube insertion. Teeth can be flossed and brushed.

- **Eyes and ears**

One ear accepts a hearing aid. Ears can be cleaned with dry cloth or cotton swab. Both eyes can be irrigated with eye drops and are removable.

- **Male and female genitalia**

Both are provided and held in place with Velcro®. Catheterization or a vaginal douche can be simulated without passing fluid. Perineal care can be practiced.

- **Joints**

Manikin bends at the elbow, knee, shoulder, and hip.

- **Decubitus ulcer**

A foam decubitus ulcer is included and can be placed anywhere on the manikin to simulate a bed sore.

- **Other features**

Grandma Chase also comes with a tracheostomy, a rectum that accepts rectal thermometers or water enemas, and an ostomy stoma. Manikin weighs 38 lbs.

Great for long-term, geriatric, or convalescent care.

Procedure Simulators

Forceps OB Delivery Manikin

AA-9550 Forceps OB Delivery Manikin, $1,458.00

Anatomically correct pelvic model with premature and full term fetuses for practicing forceps and vacuum assist delivery. Includes simulated blood powder, an extra vulva, and a soft carrying bag. Pregnant belly overlay and transparent overlay can be added to this manikin.

- Realistic practice of delivery techniques (forceps, vacuum assist)
- Lifelike pelvic cavity
- Removable abdominal overlay
- Soft skin vulva (anatomically correct)
- Two infant fetuses (premature and full term with fontanel and cranial sutures)

Female Catheter Simulator

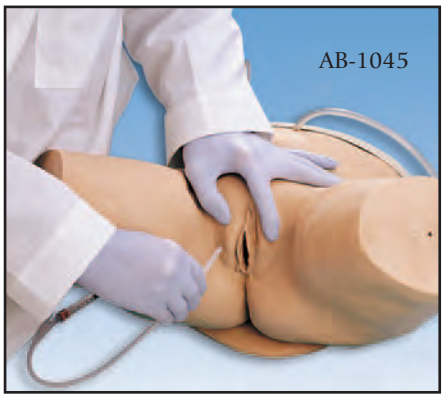
AB-1045 Female Catheter Simulator in Carrying Case, $1,082.00

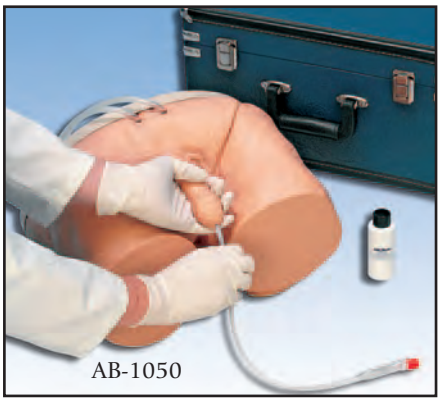
Simulates the torso of a middle aged woman properly positioned for catheterization. External genitalia and perineum are lifelike and the labia minora can be spread to reveal the clitoris, urethral opening, and vaginal introitus.

Inside there is a bladder reservoir, urethra, and a simulated urethral sphincter.

Normal resistance and pressure are experienced as the catheter passes through the urethra, past the sphincter, and into the bladder. Fluid then passes through the catheter as it does with a real patient.

This Female Catheterization Simulator comes with lubricant, catheters, a teaching guide, and a carrying case.





Male Catheterization Simulator

AB-1050 Male Catheterization Simulator, $1,033.00

A lubricated catheter can be inserted in the urethral orifice, passed through the urethra, and entered into the bladder. Fluid flows from the catheter when the bladder is successfully entered. The normal restrictions caused by the mucosal folds, the bulbous urethra, and the internal urethral sphincter are present.

The simulator teaches proper positioning and movement of the penis for catheterization with a minimum of patient discomfort.

The Male Catheterization Simulator comes with lubricant, six catheters, a teaching guide, and a carrying case.

Cath Trainers

AA-4700 Male Catheterization Trainer, $467.00
AA-4725 Female Catheterization Trainer, $452.00

Trainers have realistic feel and flexibility. 16 FR catheter can be used to demonstrate balloon inflation procedures. A fluid reservoir allows for urine output upon successful completion of procedure. Instructors are able to teach sterile technique for catheter insertion/removal, as well as patient prep for the procedure.

Your opinion counts, let us hear from you at: *csr@armstrongmedical.com*

Hours: 8:00 - 4:30 CST*

PLACING YOUR ORDER

- When placing your order with us , please refer to your customer code number, which appears on all of our invoices and packing lists.
- Please write your customer code number on the outside of your catalog for immediate reference when placing phone orders.
- All federal government orders, other than credit card, must be in writing. Please fax your order to us or send in by mail. Thank you.
- Although they may not be listed individually, Customer Service can help you order special parts; please just ask.

TERMS OF SALE

- Net 30 days for regular customers with established credit.
- Visa, MasterCard, American Express, and Discover accepted.
- Orders paid by credit card may be subject to a 3% processing fee
- A service charge of $20.00 will be added to orders under $100.00.
- Service or handling charges are not refundable.
- Terms: payment in advance or net 30 days based upon credit approval.
- C.O.D. shipments are not available.
- Delinquent accounts assessed a finance charge equal to an annual rate of 18%.

CATALOG PRICING

- Prices do not include assembly
- Products are priced "each" unless otherwise noted.
- Our prices are as current as possible, but many of our suppliers issue price changes without notice. Therefore, all prices are subject to change without prior notice.
- When calling our Customer Service Department for any reason, please ask if your price listings are current. Since all catalogs will be numbered or dated, please refer to the date.
- This catalog is available free of charge to any qualified individual, organization, or institution.

SHIPPING TERMS

- Our standard shipping terms are prepaid and added to the invoice.
- In stock, small parcels are delivered within 7-10 days.
- Cart delivery time confirmed at the time of order.
- Standard shipping for small packages is FedEx® Ground. Expedited shipping is available for most items at an additional cost.

NATIONAL SALES FORCE

- Armstrong Medical Industries, Inc. supports our customers with a National Sales Force to assist with product demonstrations or any technical questions about our products. Please ask our Customer Service Department for the name of the representative in your area.

RETURNED GOODS

- All returned goods must have an authorization number assigned by our Customer Service Department. Returns must be within 30 days from date of original shipment.
- Please refer to your invoice number and customer code number when phoning in your request for returning merchandise.
- All returned goods must be sent prepaid. Any return that is not prepaid will be refused.
- Diagnostic, resuscitation equipment, sterilized items, non-stock items, customized orders, A-SMART® Carts, and supply carts are non-returnable. Our Customer Service Department will be glad to answer any questions you may have regarding returns.

RESTOCKING CHARGE

- A 15% restocking charge may be charged to your account for returned merchandise.
- An exception to this policy would be if we shipped incorrect merchandise. If this is the case, please call our Customer Service Department and report the incorrect shipment within 10 days. The same policy regarding an authorization number applies.

DAMAGED GOODS

- If you receive a small package that you believe is damaged, we ask that you call your delivery service for an inspection of the damaged articles.
- Please save all boxes and packing material to prove that the items were packed properly.
- **All small parcel damage claims must be reported within 10 days after receipt of merchandise. All truck order damage claims must be reported within 7 days. All moving van damage claims must be noted at the time of delivery.**
- Photos required for all damage claims of both packaging and product damage.
- If you receive a shipment via truck, inspect all cartons and note visible damage on Bill of Lading **BEFORE SIGNING YOUR NAME.**

**When ordering, please remember that the lunch hours are always our busiest times. Thank you for your patience.*
