26TH Anniversary Celebartion

SINCE 1999

ISO13485 FDA CE MDR MDMA

A Leading Manufacturer Of Home Medical Equipment

XIAMEN SENYANG CO., LTD

ABOUT US

Xiamen Senyang Co., Ltd was found by Mrs. Susan Wang in 1999, with the intention to make more people healthier.

Senyang is a professional alternating pressure air mattress system for pressure ulcer prevention developer and manufacturer. After got successful with products for Althernating pressure mattress system in shortly time, Senyang took also compression therapy system and transfer lift into the portfolio.

Today Senyang presents itself as a leading manufacturer in home medical equipment.

What can we offer to you?

Focus on optimizing the production of home care products for the elderly disabled. Senyang continuous development in R&D technology , and runs by a core team of highly qualified professionals with a deep understanding of the products and services. It helps Senyang to satisfy the needs of customers from developing and designing to manufacture requests. Senyang always try to convey our services with the best care, knowledge and a passion for excellence.

YOUR HEALTH, WE CARE.

MANUFACTURING ENVIRONMENT

Experienced

We have over 26 years of industry production experience and are committed to providing professional elderly care and rehabilitation products and solutions.

Excellent quality control

We have over 200 professional skilled workers, advanced production equipment, 24000 square meters of production area, and adopt strict product quality control processes.

Our Qualifications: ISO13485 : 2016.
Our principle: Quality, Innovation, Honesty, Development.

Continuous and efficient R & D

We have a professional R&D team that continuously develops products and technologies to ensure that we remain at the forefront of the industry.

Automated production material processing flow

Customized services

Our company undertakes OEM & ODM business, and this catalog does not display products customized by all global brands.

We can meet customers' personalized customization requirements and even develop new products based on their needs.

Exhibition time

We maintain active contact and communication with customers through professional exhibitions held around the world every year, and pass on our manufacturing capabilities and professionalism to more people.
We have also made many new friends, laying a solid foundation for more extensive cooperation in the future.

Welcome to visit Senyang at professional exhibitions around the world every year.

ALTERNATING PRESSURE MATTRESS WITH PUMP SYSTEM

STAGE I–IV FOR ANTI DECUBITUS & PRESSURE ULCER

ALTERNATING PRESSURE MATTRESS WITH PUMP

BEST CHOICE HIGH QUALITY

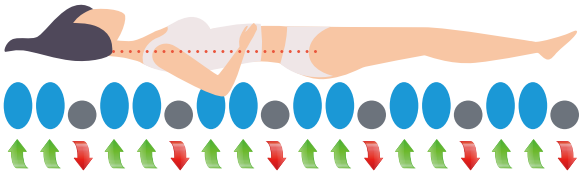
T05+P09

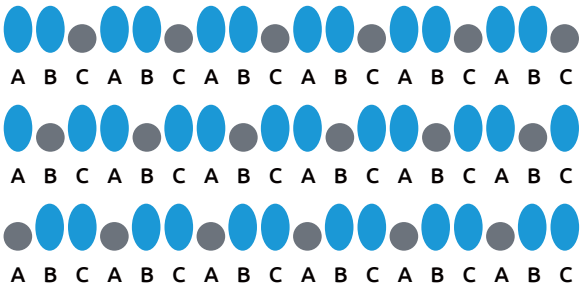
ISO13485 FDA CE MDR MDMA



A/B/C cycle alternating mode

During the alternating process, there are always 2 sets of air cells in a fully inflated state, which means there are 12 air cells that can share and support the patient's weight.

Compared with the A/B alternating mode (where only 9 air columns remain inflated at the same time), the A/B/C cyclic alternating mode can better share the weight of the user. Users feel more comfortable and have better sleep quality.



Schematic diagram of A/B/C cycle alternating mode

Super quiet design
Biological histocompatibility
Water vapor permeation
Waterproof
Pillow function
Nylon TPU
Multiple customized colors
Flame resistance (option)

MATTRESS T05

Alternating mode:	A/B or A/B/C
Size:	80"L*32"~36"W*4.5"H(18cells)
	4"H(24cells) and 5"H(16cells) for more options
Mattress material:	Nylon TPU
Cover material:	PU or thin cover
Net weight:	4.58Kg
Weight capacity:	145Kg

*CPR for quick air release; Pillow function.

PUMP P09

Power:	110V/60Hz or 220V/50Hz
Air output:	7L/min
Cycle time:	14mins (A-B lines alternation), 21mins (A-B-C lines alternation)
Size:	270*130*90mm(L*W*H)
Net Weight:	1.3Kg
Function:	Static/ pressure indication/ alarm/ adjustable cycle time

Nylon TPU material

TPU is more elastic and soft, providing a more comfortable sleeping experience. And it performs better in extreme temperatures, maintaining stability without becoming brittle.

Tpu also offers better sealing and resistance to seepage.

P08A

Static mode
Low pressure indicator light
Power failure alarm
Size: 270*130*95mm(L*W*H)
Net Weight: 1.29Kg

More combinations can be made according to customer needs.

ALTERNATING PRESSURE MATTRESS WITH PUMP

T06+P06A

ISO13485 FDA CE MDR MDMA

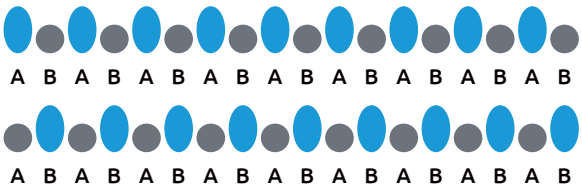
In AB alternating mode, the alternating pressure mattress offers several benefits:

1 Pressure Relief: Alternating inflation reduces pressure on specific body areas, preventing pressure ulcers.

2 Improved Circulation: The pressure shift promotes blood flow, reducing discomfort from prolonged lying.

3 Enhanced Comfort: Even pressure distribution adapts to the body, improving sleep quality.

4 Ideal for Long-Term Bedridden: Provides support and comfort for patients or individuals who are bedridden for extended periods.



Schematic diagram of A/B cycle alternating mode

MATTRESS T06

Alternating mode:	A/B
Size:	80"L*32"~36"W*4.5"H(18cells), 4"H(24cells) and 5"H(16 cells) for more options
Mattress material:	Nylon TPU
Cover material:	PU or Nylon PVC or pure TPU
Net weight:	6.95Kg
Weight capacity:	210Kg

*Multiple color customization schemes/ Bottom sponge pad

PUMP P06A

Power:	110V/60Hz or 220V/50Hz
Air output:	7/12 L/min
Cycle time:	6/9/12/25 mins
Size:	345*115*185mm(L*W*H)
Net Weight:	2.55Kg

*Knob adjusts the pressure

Bottom sponge pad

Adding a foam pad underneath a cyclic alternating air mattress can enhance overall comfort and support, reducing the sensation of movement caused by air flow. Additionally, the foam provides better insulation, helping to maintain warmth and preventing cold from affecting sleep.

Super quiet design
Biological histocompatibility
Water vapor permeation
Waterproof
Pillow function
Nylon TPU
Multiple customized colors
Flame resistance (option)

P06B

Pressure display
Size: 345*115*185mm(L*W*H)

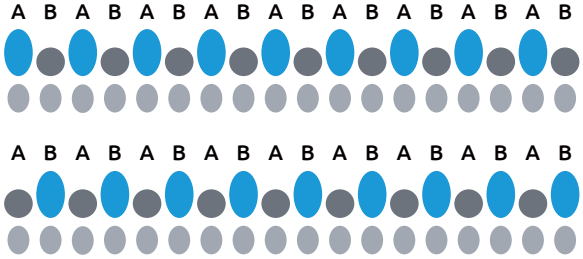
ALTERNATING PRESSURE MATTRESS WITH PUMP

BEST CHOICE HIGH QUALITY

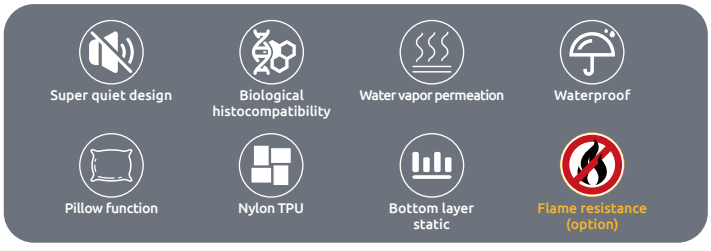
T04+P02

ISO13485 FDA CE MDR MDMA



A/B cycle alternating mode

- Stage IV Intensive care
- Bottom layer can do static and upper layer A-B or A-B-C or A-B-C~S or A-B~S cycle alternating
- 2-way stretch PU cover with snap fixture, waterproof, fire retardant(option)
- CPR for quick air release in emergency
- Ventilated bladder
- Warranty: 1 year



Static bottom air column provides extra support and comfort, and can enhance overall sleep quality.

The vents on a cyclic alternating air mattress are primarily used to regulate air pressure and ventilation,preventing overheating or moisture buildup.

MATTRESS T04

Size:	80"L*32"~36"W*8"H(18cells)
Bariatric size:	42"/48"(width)
Mattress material:	Nylon TPU or Pure TPU, Nylon PVC
Cover material:	PU
Net weight:	8.35Kg
Weight capacity:	210Kg

*Alternating mode: A-B or A-B-C or A-B-C~S or A-B~S; Pillow function

PUMP P02

Power:	110V/60Hz or 220V/50Hz
Air output:	12L/min
Cycle time:	15mins
Fuse:	1A*2
Size:	258*85*250mm(L*W*H)
Net Weight:	2.5Kg

*3 or 4 air hose connection

Function: 30mins static mode/ key lock/ alarm/ low pressure indicaton light

P06A

Knob adjust
Net Weight: 2.55Kg

P06B

Pressure display
Net Weight: 2.55Kg

P06C

Touch screen
Net Weight: 2.55Kg

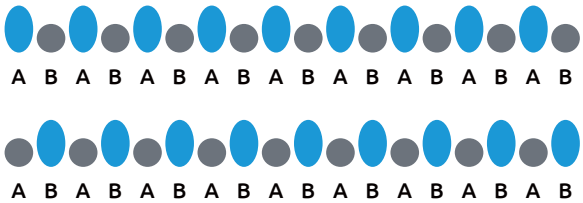
More combinations can be made according to customer needs.

ALTERNATING PRESSURE MATTRESS WITH PUMP

BEST CHOICE HIGH QUALITY

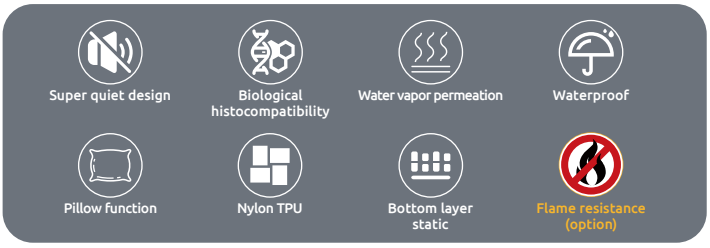
T08+P06C

ISO13485 FDA CE MDR MDMA



Schematic diagram of A/B cycle alternating mode

- Stage IV Intensive care
- 2-way stretch PU cover with zipper closure, waterproof, fire retardant(option)
- CPR for quick air release in emergency
- Ventilated bladder
- Warranty: 1 year



Option:
Top layer and second layer A-B or A-B-C line alternate, bottom layer and pillow keep static.

The vents on a cyclic alternating air mattress are primarily used to regulate air pressure and ventilation,preventing overheating or moisture buildup.

MATTRESS T08

Size:	80"L*32"~36"W*9"H(20cells)
Bariatric size:	42"/48"(width)
Mattress material:	Nylon TPU or Pure TPU
Cover material:	PU
Bottom material:	Dacron PVC
Net weight:	8.35Kg
Weight capacity:	210Kg

*Three layer mattress;
Alternating mode: A-B or A-B-C or A-B-C~S or A-B~S;

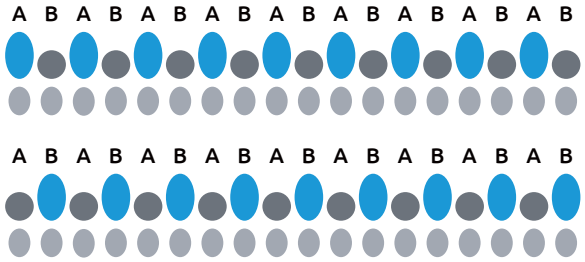
ALTERNATING PRESSURE MATTRESS WITH PUMP

BEST CHOICE HIGH QUALITY

T09+P06B

ISO13485 FDA CE MDR MDMA



A/B cycle alternating mode

- Stage IV Intensive care
- Bottom layer can do static and upper layer A-B or A-B-C or A-B-C~S or A-B~S cycle alternating
- 2-way stretch PU cover with zipper closure, waterproof, fire retardant(option)
- CPR for quick air release in emergency
- Ankle groove design to release pressure
- Warranty: 1 year

Static bottom air column provides extra support and comfort, and can enhance overall sleep quality.

The ankle groove design reduces local pressure, promotes blood circulation, enhances comfort, reduces friction and compression in the ankle area, and is suitable for users of different body types.

MATTRESS T09

Size:	80"L*32"~36"W*8"H(18cells)
Bariatric size:	42"/48"(width)
Mattress material:	Nylon TPU or Pure TPU, Nylon PVC

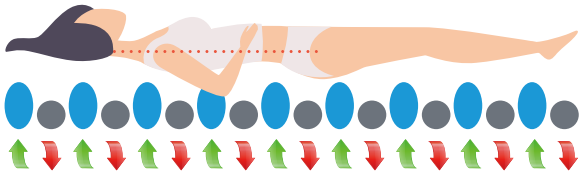
ALTERNATING TURNING MATTRESS WITH PUMP

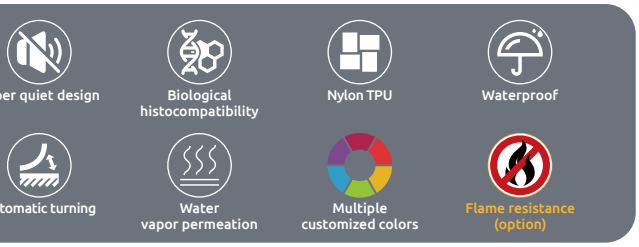
T11+P11

ISO13485 FDA CE MDR MDMA



Aircells Cyclic Fluctuation, Alternating Pressure Release

Air cell A **Air cell B**



- Stage IV Intensive care
- A-B lines air tubes alternating for anti bedsore/decubitus
- Automatic turning function (turning degree 30°)
- CPR for quick air release in emergency
- Warranty: 1 year

MATTRESS T11

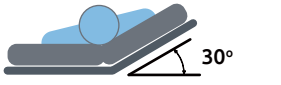
Size:	79"L*35"W*4.5"H(18cells)
Materials:	Nylon TPU or nylon PVC
Max. User Weight:	200 kg
Cover material:	2-ways stretch PU cover, water-proof, easy clean
Working mode:	AB alternating
Function:	Auto turn function(Left/ Right 30°)

*Multiple color customization schemes

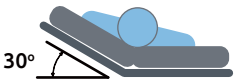
PUMP P11

Power:	110V/60Hz or 220V/50Hz
Air output:	7 L/min
Size:	258*85*250mm(L*W*H)
Net Weight:	2.5Kg
Characteristic:	Ultra silence, noise ≤35dB
	Six grades of pressure adjustable
	Auto turn, Left/ Right turn, No turn

*4 air hose connection



Left side turning



Right side turning

Automatic turning function
Achieve left and right side circulation decompression while lying down.
It can significantly reduce the risk of pressure sores from prolonged lying down, enhance blood circulation, and improve overall comfort.

CPR straps
CPR for quick air release in emergency.

Applicable places
Widely applicable to hospital wards, nursing homes, nursing institutions, etc.

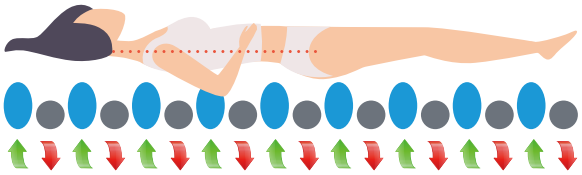
The benefits of alternating turning mattresses
Nursing staff do not need to manually flip patients, reducing workload and improving nursing efficiency.

HIGH-LEVEL+ ALTERNATING TURNING MATTRESS WITH PUMP

BEST CHOICE HIGH QUALITY

T13+P13

ISO13485 FDA CE MDR MDMA



Aircells Cyclic Fluctuation, Alternating Pressure Release

Air cell A **Air cell B**

- Super quiet design
- Biological histocompatibility
- Water vapor permeation
- Waterproof
- Automatic turning
- Head up & foot up
- Multiple customized colors
- Flame resistance (option)

- Stage IV Intensive care
- Head up and foot up function
- Automatic turning function
- CPR for quick air release in emergency
- Warranty: 1 year

MATTRESS T13

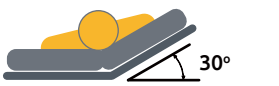
Size:	79"L*35"W*4.5"H(18cells)
Materials:	Top grade TPU with Nylon material
Max. User Weight:	200 Kg
Cover material:	2-ways stretch PU cover, water-proof, easy clean
Working mode:	AB Alternating
Function:	Auto Turn function(Left/ Right 30°)
	The function of head up and foot up

*Multiple color customization schemes; one or two layers are optional

PUMP P13

Power:	110V/60Hz or 220V/50Hz
Air output:	7 L/min
Size:	360*210*120mm(L*W*H)
Net Weight:	2.7Kg
Characteristic:	Ultra silence, noise ≤35dB
	Eight grades of pressure adjustable
	Auto turn, Left/ Right turn, No turn

*6 air hose connection



Left side turning

Right side turning

The benefits of alternating turning mattresses

Nursing staff do not need to manually flip patients, reducing workload and improving nursing efficiency.

Automatic turning function

Achieve left and right side circulation decompression while lying down.

It can significantly reduce the risk of pressure sores from prolonged lying down, enhance blood circulation, and improve overall comfort.

Head up and foot up function

Improved circulation.

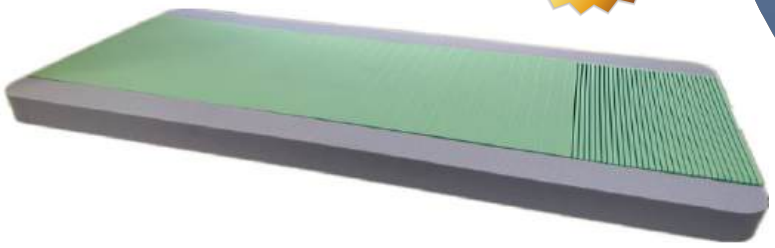
Pressure Relief, providing better overall comfort.

Enhanced breathing.

By improving body alignment and reducing pressure may enhance overall sleep quality.

ANTI-DECUBITUS FOAM MATTRESS

Static Pressure Ulcer Prevention Series



ISO13485 FDA CE MDR MDMA

Anti-decubitus

Biological histocompatibility

Water vapor permeation

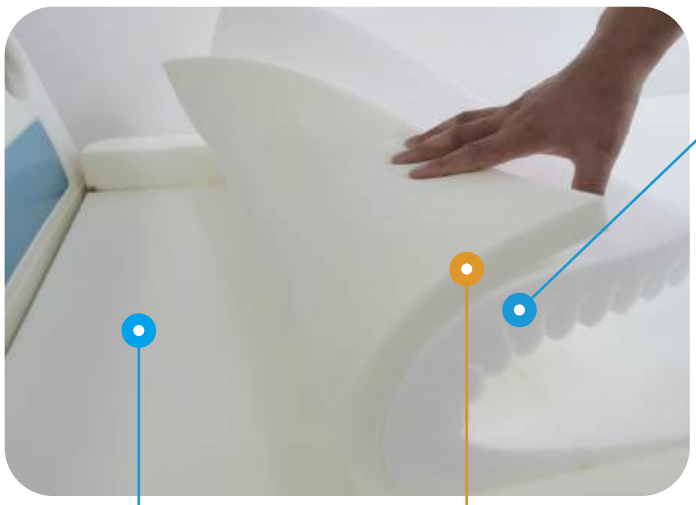
Waterproof

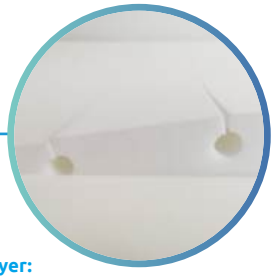
Antibacterial (option)

Flame resistance (option)

FOAM MATTRESS

Size:	75"L*35"W*3.9"H
Materials:	Foam
Max. User Weight:	≥ 100Kg
Cover material:	Medical PU material
Warranty:	1 year





Top Layer:
High elasticity foam

The 2.5cm independent T-shaped columns from the back to the hip area effectively support different body parts of varying shapes and weights, promoting blood circulation and comfort. The leg and foot areas feature a finely cut design that provides a massage effect and adapts to the ankle.

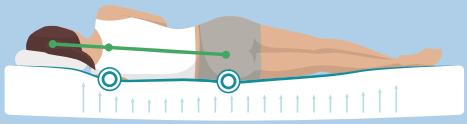
Second Layer:
Slow rebound memory foam

Pressure buffering layer offers weight redistribution and full pressure dispersion.

Third Layer:
High hardness foam

Rigid support.

Static Pressure Ulcer Prevention Foam Mattress has right firmness. It provides appropriate and comfortable support for the human body, ensuring that the deformation of the spine will not be caused by discomfort in the softness and hardness of the mattress.



Designed with a combination of three functionally distinct foams

The upper layer features a special cut groove design for pressure relief. The middle layer is made of slow-rebounding memory foam, which maximizes pressure distribution. The lower layer consists of a high-density foam with an integrated U-shaped groove design. The combination of these three functional foams redistributes the weight, effectively dispersing pressure and preventing the formation of bedsores.

Inflatable & deflated air valves

Can quickly inflate and deflate, easy to use.

Hand Pump

BS01

Pull hole

Can conveniently and quickly lift and transfer patients to designated locations.

STATIC BUBBLE BEDSORE PREVENTION TRANSFER MATTRESS

Size:	79"x33"x3.9"

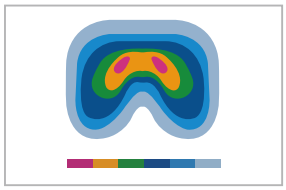
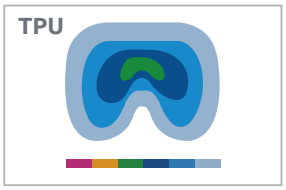
ANTI-DECUBITUS SEAT CUSHION (TPU)

ISO13485 FDA CE MDR MDMA

Capacity: 100Kg



Ordinary seat cushion
Bigger sitting pressure



TPU seat cushion
Sitting area increased 30%
Pressure reduce 1/3

- Medical grade materials
- Exquisite workmanship and durable
- Pressure dispersion
- Skin friendly & breathable
- Easy to clean
- Excellent hip & legs support

- Pressure dispersion design reduces the risk of pressure ulcers
- Lightweight and Portable
- Users can adjust the comfort
- TPU material is environmentally friendly

GEL PAD FOAM CUSHION

ISO13485 FDA CE MDR MDMA

WG-ZKZD0004

SPECIFICATIONS

Material:	Mesh cloth + Gel + Memory foam 45D
Size:	420L*340W*70H mm
Weight:	800g
Package:	10pcs/Ctn
Ctn:	66x46x35.5 cm

RECOMMENDED APPLICATIONS

Help relieve symptoms of hemorrhoids, prostatitis, postpartum, and lower back pain. It comes with a cooling gel layer at the top to keep cool and comfortable.

WG-ZKZD0005

SPECIFICATIONS

Material:	Black flannel + Memory foam 45D
Size:	445L*360W*70H mm
Weight:	1200g
Package:	10pcs/Ctn
Ctn:	63x45.5x37 cm

RECOMMENDED APPLICATIONS

Pain and tension relieve in the lower back, coccyx, buttocks, spine and sciatic nerve areas, with a cooling gel layer on top to keep cool and comfortable.

MEMORY FOAM CUSHION

WG-ZKZD0006

SPECIFICATIONS

Material:	Polyester + Memory foam 45D
Size:	445L*360W*70H mm
Weight:	800g
Package:	10pcs/Ctn
Ctn:	63x45.5x37 cm

RECOMMENDED APPLICATIONS

Relieve the pain for hip and leg caused by chronic poor sitting posture. The shape supports your tailbone, waist, spine and buttocks, reducing stress.

WG-ZKZD0008

SPECIFICATIONS

Material:	Black flannel + Memory foam 45D
Size:	450L*365W*95H mm
Weight:	675g
Package:	10pcs/Ctn
Ctn:	66x46x38 cm

RECOMMENDED APPLICATIONS

Pain relief, suitable for hemorrhoids, cracks, joint pain, surgery, postpartum recovery, etc.

DVT COMPRESSION THERAPY GARMENT

ISO13485 FDA CE MDR MDMA

BEST CHOICE HIGH QUALITY

Senyang Tri/Uniform Pulse Sequential Garments

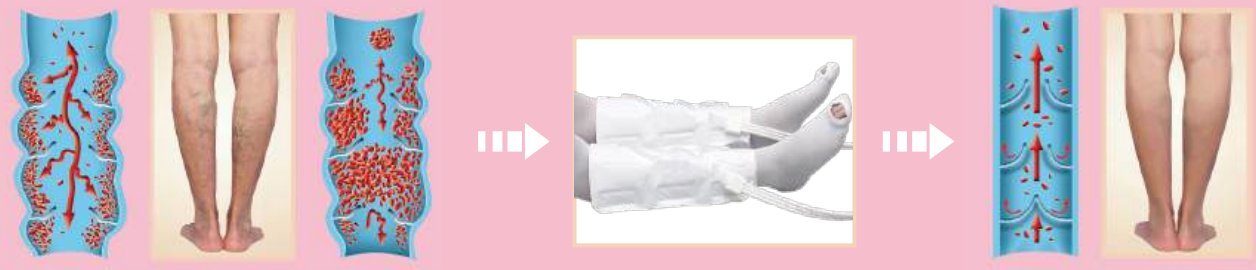
Application	Item No.	Size
Foot	DVT-F10	Uniform
Calf	DVT-C20	S/M/L
Boot	DVT-B30	S/M/L
Thigh	DVT-T40	S/M/L

- 360° All-round massage
- Air pressure massage
- Breathable fabric
- Time controllable
- Suitable for various types of air pumps
- Convenient & wearable

DVT sleeves are used to relieve leg pain, promote muscle recovery, and treat shinitis and varicose veins.

DVT Manufacturer Over 20 years / OEM & ODM

Why use DVT sleeves?



Thrombosis
Damaged open and warped valves
Blood flowing in both direction
Blood accumulating in vein

Embolus
When blood moving slowly, a clot or thrombus can form. A part of the clot can break off and travel in the bloodstream (embolus).

Use DVT compression therapy garment for treatment

Normal vein
Blood moving toward the heart

DVT compression therapy garments play a crucial role in the prevention and treatment of DVT by improving blood circulation, reducing blood stasis, and alleviating swelling and discomfort. For high-risk individuals or patients who have already developed blood clots, compression therapy serves as an effective adjunctive treatment that can significantly reduce the risk of disease progression.

AIR PRESSURE THERAPY SYSTEM

BEST CHOICE HIGH QUALITY

PT1002

ISO13485 FDA CE MDR MDMA

PUMP PT1002

Massage mode:	A.B mode available
Pressure range:	20~200mmHg(±10~15%)
Timer:	10.20.30 mins
Power consumption:	40VA
Voltage:	AC110V/60Hz or AC220V/50Hz
Machine size:	260*170*130mm (L*W*H)
Machine weight:	2.5Kg
Certificate:	FDA / 510K(K161907) / CE

*Multiple color customization solutions for air pumps and sleeves.

The Air Pressure Therapy System is a medical device designed to improve blood and lympha circulation, pain edema relief, prevent DVT through intermittent pneumatic compression.

The key feature: Multi-setting, easy application.

- Air pressure massage
- All-round massage
- Two massage mode
- Time controllable
- Breathable fabric
- Loop mode

AIR PRESSURE THERAPY SYSTEM

PT1003

ISO13485 FDA CE MDR MDMA

PUMP PT1003

WHY US?

Providing you with high-quality physical therapy and relaxation experience

Features:

*Over lap
*Promote wound healing
*Promote wound healing
*User friendly home care
*Preventing DVT
*Increase lymphatic and vascular flow
*Provide convenient sports injury & fatigue recovery
*Easy to use, improving patient compliance
*Compact and foldable design, easy to carry

NURSING TRANSFER LIFT

BEST CHOICE HIGH QUALITY

BMW01

ISO13485 FDA CE MDR MDMA

BMW01
Powered Nursing Transfer Lift

Maximum outline size:
545*725*980mm (L*W*H)

Lifting range: 250mm

Machine weight: 23Kg

Charging requirements:
Dedicated adapter charging

Rated power: 100W/2A

Load weight: ≤150Kg

Electric lift is mainly used as nursing equipment to help disable or elder people move without barriers, used for short-distance displacement and rehabilitation care. Through the control handle, nursing staff can easily transfer the patients. When using, they can push forward or backward or lock the rear wheels, so that the elderly or the disabled can be barrier-free in hospital beds and toilets, the living room, outdoors and other places. It greatly reduces the work intensity of nursing staff and family members, improves nursing efficiency, reduces nursing risks and prevents patients from encountering secondary injuries during transfer.

- Painted steel pipe
- Free lift
- Strong bearing capacity
- Easy opening and closing
- Easy installation
- Silent universal wheel

Lifting range:	250mm
Machine weight:	28Kg
Charging requirements:	
Dedicated adapter charging	
Rated power:	100W/2A
Load weight:	≤150Kg

Features

I Enhanced Safety: It reduces the risk of falls and injuries during transfers for both patients and caregivers.

II Improved Patient Comfort: The device typically provides a smoother and more comfortable transfer experience, reducing anxiety for patients.

III Versatile Use: It can be used in various settings, including hospitals, nursing homes, and at home, offering flexible transfer solutions.

IV User-Friendly Operation: Many models feature simple controls, making them easy for caregivers to operate with minimal training.

V Promotes Independence: In some cases, patients can use the lift with guidance, enhancing their independence and confidence.

Dimensions:	891x676x1166mm (L*W*H)
Battery:	Medical lithium iron phosphate
Waterproof rating:	IP22
Load capacity:	150Kg
Charging:	Special adapter
Driving speed:	2KM/H
Control:	Joystick+buttons

IP22 waterproof can shower

Folding design compact storage

Joystick operation

Patient autonomous operation

Silent operation

Anti impact & anti self ignition

150 kg load-bearing capacity

2 km per hour

2 PANEL CONTROL OR MANUAL OPERATION
MODES OF OPERATION

Suspended Seat System

Load weight: ≥150Kg,
instantaneous load-bearing capacity ≥270Kg.
Foam cushion, safe and comfortable.

Multi-function control panel

Easy and convenient operation, and patients can operate on their own.

Fully enclosed joint design

Anti collision, good reliability, no pollution.

Folding design

Space saving, convenient storage, suitable for long-distance transportation.

Leg widening mechanism

The leg spacing can be widened to 76 cm to adapt to a wider range of places.

IP22 waterproof

Can be used in the shower,
fully aluminum body.
Lithium iron phosphate batteries for automobiles, anti impact and self ignition.

Silent tires

Use low noise.
The speed is 2 kilometers per hour and can be set.
